Safety Instructions

- To use the Phone, please follow the instructions in this user manual.
- Use the power adapter supplied with your phone. Other power adapters may damage the phone.
- This phone is only for indoor use. And also avoid in high humidity, water and some other liquids.
- Do not use the phone during thunderstorms.
- CE
- FCC

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

Cleaning

To clean the device, use an anti-static cloth. Please avoid cleaning liquids as they might
FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
   (1) This device may not cause harmful interference.
   (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
   - Reorient or relocate the receiving antenna.
   - Increase the separation between the equipment and receiver.
   - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   - Consult the dealer or an experienced radio/TV technician for help.
Summary of changes

This section describes the changes to this user manual for each release and user manual version.

Change for Release x.0.4.4.27, Manual version x.0.4.4.27

Major updates have occurred to the following sections:
- UC924 supports 12 accounts

Change for Release x.0.4.0.10, Manual version x.0.4.0.10

Major updates have occurred to the following sections:
- Label Scroll

Change for Release x.0.4.0, Manual version x.0.4.0

Major updates have occurred to the following sections:
- IPv6
- IPv4&IPv6

Change for Release x.0.3.98.O, Manual version x.0.3.98.O

Major updates have occurred to the following sections:
- Reboot in Talking

Change for Release x.0.3.98.A, Manual version x.0.3.98.A

Major updates have occurred to the following sections:
- Auto Logout Time

Change for Release x.0.3.98, Manual version x.0.3.98

Major updates have occurred to the following sections:
- Daylight Saving Time
Change for Release x.0.3.93, Manual version x.0.3.93

Major updates have occurred to the following sections:
- Check-Syn With Authenticate
- Call Back

Change for Release x.0.3.88, Manual version x.0.3.88

Major updates have occurred to the following sections:
- Visual Alert for BLF Pickup
- Detect IP Conflict

Change for Release x.0.3.72, Manual version x.0.3.72

Major updates have occurred to the following sections:
- Voice Mail Tone
- Backup NTP Server
- Intercom Barge

Change for Release x.0.3.65, Manual version x.0.3.65

Major updates have occurred to the following sections:
- Redial Mode

Change for Release x.0.3.63, Manual version x.0.3.63

Major updates have occurred to the following sections:
- Suppress DTMF Display
- Suppress DTMF Display Delay

Change for Release x.0.3.62, Manual version x.0.3.62

Major updates have occurred to the following sections:
- Auto Redial

Getting Started

Packing List

The package contains the following parts, please check if all the items are not missed:

1. The phone station

2. The phone stand
3. Handset

4. Headset cord

5. Power adapter
6. Ethernet cable

Phone Installation

1. Attach the phone stand
2. Connect the Handset and optional Headset

3. Connect the Network and Power
Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization
The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display “Booting”

And then show “Initializing “during the initialization.

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show “Check firmware, please wait…” after initialization.
Then IP Phone will show Reboot information:

By default, the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

**Status**

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information (e.g., Model, IP, MAC, Firmware, Hardware), Network (e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS ...), Account (e.g., register status of accounts).

**To view the phone status via phone interface:**

1. Press Menu → Status → Information
### Getting Started

1. **Press Menu → Status → Network**

#### Network

<table>
<thead>
<tr>
<th><strong>1. IPV4</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2. IPV6</strong></td>
</tr>
<tr>
<td><strong>3. IP Port Mode:</strong> IPV4&amp;IPV6</td>
</tr>
<tr>
<td><strong>4. LAN Type:</strong> Bridge mode</td>
</tr>
<tr>
<td><strong>5. MAC:</strong> 00:1f:c1:1c:64:44</td>
</tr>
</tbody>
</table>

#### IPV4

| **1. WAN Type:** DHCP mode |
| **2. WAN IP:** 192.168.1.131 |
| **3. WAN Mask:** 255.255.255.0 |
| **4. Gateway:** 192.168.0.2 |
| **5. Pri.DNS:** 192.168.0.2 |
5. Press Menu →Status →Account (UC924 support twelve accounts)

To view the phone status via Web interface:

Login web interface (For How to login, please refer to Web Login)

View the information of Version, Account and Network.
Registration

To register via phone interface:

1. Press Menu → Settings → Advanced Setting (default password: admin) → Accounts
2. Select the desired account
3. Select Enable for Account active
4. Select the desired profile of the account.
5. Fill the SIP User ID, Authenticate ID
6. Fill the Password and Name (shown on LCD).
7. Press Save to save the configuration.

![Account Configuration](image)

**Note:**
If there is a port of sip server, you need to press “1” on the keypad, then you will find the “:”.

**Additional Information:**
When the current input method is ABC/abc/2ab,
Pressing “1”, you will find “., ?:;”
Pressing “0”, you will find “< > () {} []”
Pressing “*”, you will find “*/!” @$”
Pressing “#”, you will find “#%&*]”

**To register via Web interface:**

1. Login Web interface and Click Profile→Basic.
2. Fill the Primary SIP Server and other profile information.

3. Select the SIP Transport.

4. Click SaveSet to save the configuration.

5. Click Account ➔ Basic.
6. Select Yes for Account Active.

7. Select the desired Profile.

8. Fill the SIP User ID, Authenticate ID, Authenticate Password and other account information.

9. Click SaveSet to save the configuration.

Note:
1. All fields with * must be filled. If changed, it requires a phone restart.
2. Account Status says the account registered successfully or not.
**Idle Screen**

User Interface

There are two ways to customize specific configurations on your IP phone:

- The user interface on the IP phone
- The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

Basic Setting Configuration

This part will mainly introduce the basic configuration as the Time, Language, and Volume…

General Settings

Web Login

1. Get the IP address: Press Menu →Status →Information.

   ![Information]

   1. Model: UC924
   2. IPV4: 192.168.1.131
   4. MAC: 00:1f:c1:1c:64:44
   5. Firmware(IMG): 2.0.4.4.29(2018-03-05 ..

2. Input the IP Address in the web browser.

3. Input the user name (default is admin), password (default is admin).

4. Login successfully.
Basic Setting Configuration

Note:
The PC and phone should be in the same segment.
When registering the accounts in web and the server port is not “5060”, the “SIP Server” should be set as “SIP Server’s IP address: server port.”, for example, “192.168.0.122: 5090”.

Administrator Password

The password is mainly used for login the Web interface or set the Advanced Setting through Phone interface. And the default password of the administrator is: admin

To change to password via Phone Interface
1. Press Menu → Settings → Advanced Setting → password (default admin) → Phone Setting → Set Password
2. Enter the current PWD (password), new password and confirm the new password.

3. Press Save soft key or to save the new password.

To change to password via Web Interface
1. Management → Password

2. Fill the value

3. Click to save the configuration.

Note:
When you use the Web interface: user name: admin     password: admin (default)

Display Mode

This phone supports two Display modes: Text and Icon.
**Icon Mode**: all items are shown same as the main with icon.

**Text Mode**: Only the 8 main items will be shown as icon, and others all text description.

**To Configure Display mode via Phone interface**:

1. Press Menu → Display → Display Mode
2. Select Text or Icon
3. Press Save soft key to save the configuration.

**To Configure Display mode via Web interface**:

1. Login Web interface, and click Setting → Preference
2. Select Icon Mode or Text Mode for the Display mode
3. Click **SaveSet** to save the configuration.

**Language**

The default Phone interface language is English.

**To change the language via Phone interface**

1. Press Menu → Settings → Basic Setting → Language.
To change the language via Web Interface

1. Setting → Preference → Web Language & LCD Language

2. Press or Save soft key to save the configuration.
2. Select the necessary one.

3. Press \text{SaveSet} to save the configuration.

\begin{center}
\includegraphics[width=\textwidth]{config.png}
\end{center}

\textbf{Note:}

All languages may not be available for selection. The available languages depend on the language packs currently loaded to the IP phone.

\section*{Wallpaper}

To change wallpaper, go by the following steps:

\textbf{To change the wallpaper via Phone interface:}

1. To press Menu → Display → Wallpaper

2. Press $\rightarrow$ and $\leftarrow$ or press Switch soft key to display the different pictures.

3. Press $\bigcirc$ or Save soft key to save the selected picture as the wallpaper.

\begin{center}
\includegraphics[width=0.5\textwidth]{wallpaper.png}
\end{center}

\textbf{To change the wallpaper via Web interface:}

1. Click Setting \rightarrow Preference
2. Select the desired wallpaper picture to upload.

3. Click [Upload Photo] to save the setting.

To delete the wallpaper via Web interface:
1. Click [Setting] → [Preference]
2. Select the desired wallpaper to delete.
3. Click [Delete] to save the setting.

Note:
System wallpaper (Wallpaper1-Wallpaper6) cannot be deleted and only color IP Phones support uploading wallpaper.

Screen Saver

There are three types of screen saver: Time & Logo, Photo Switch and Static Photo.

**Time & Logo:** When the screensaver works, it will show Time and logo in turns.

**Photo Switch:** All screensaver pictures display one by one.

**Static Photo:** Only the selected picture will display as screensaver.

**Text logo:** It works with the **Time & Logo**, when enter the value, it will display the time and the entered value in turns.

**To enable screen saver via Phone interface:**
1. To press Menu → Display → Screensaver...
2. Press ➤ and ◀ or press Switch soft key to Choose the Time-out as 1 min or 2/5/10/30 minute, then press the Save button.
3. Enter the Screensaver Type to choose one of the type: Time & Logo, Photo Switch and Static Photo

4. Press \[ \] or Save soft key to save the selected configuration.

**To disable screen saver via Phone interface**

1. To press Menu → Display → Screensaver...

2. Press \[ \] and \[ \] or press Switch soft key to Choose the Time-out as off.

3. Press \[ \] or Save soft key to save the selected configuration.
To upload screen saver via Web interface:

1. Setting → Preference

2. Choose the picture wanted to use as screen saver

3. Click **Upload Photo** to save the upload picture

To delete upload screen saver phone via Web interface:

1. Setting → Preference

2. Select the photo that to delete.

3. Click **Delete** to delete the photo.

Note:
To custom text logo via Web interface:
1. Click Setting → Preference.

2. Choose the Time-out as 1 min or 2/5/10/30 minute.

3. Enter the desired value in the Text Logo field.

4. Click to save the configuration.

To wake up screen saver via Web interface:

1. Setting → Preference

2. Choose Dial First Digit: Screensaver Wakes up or Screensaver Wakes up and Dial

3. Click to save the configuration.

Note:
1. The upload Photo size should be less than 2MB, name length should be less than 48 characters, and the File name should be letters, numbers or underline ‘_’ and photo number should be less than 9.

2. The default screensaver photos cannot be deleted.

3. You can only upload screen photos in format of ‘.bmp’ and ‘.jpg’.

Backlight

To set Backlight via Web interface:

1. Click Setting → Preference

2. Enter the time for Backlight time (In seconds).
   The default is 0, which means Backlight is always on.
Basic Setting Configuration

3. Click [Save] to save the configuration.

Backlight Time

Note:
Backlight Time refers to the time into the backlight

Time and Date

Time and date is displayed on the idle page, and it can be set automatically by SNTP server or manually by manual setting.

To configure the time and Date by SNTP setting via Phone interface

1. To press Menu → Settings → Basic Setting → Time & Date → SNTP Settings
2. Press ⬆️ or ⬅️ to change the Time zone.
3. Fill the NTP Server1, NTP Server2, and select the mode of Daylight Saving.
4. Press ⬇️ or Save soft key to save the configuration.

![SNTP Settings]

To configure time and date manually via Phone interface

1. To press Menu → Settings → Basic Setting → Time & Date → Manual
2. Press ⬆️ and ⬅️ or change the right time, or you can input the right time.
3. Press ⬇️ or Save soft key to save the configuration.
To configure the Time & Date Format via Phone interface

1. Press Menu → Settings → Basic Setting → Time & Date Format
2. Press and to change between 12 Hour or 24 Hour time display.
3. Press and to change date display format among Y-M-D(year-month-day), M-D-Y(month-day-year), D-M-Y(day-month-year).
4. Press or Save soft key to save the configuration.

To configure the DHCP time via Phone interface

1. To press Menu → Settings → Basic Setting → DHCP Time
2. Press and to change between Disable and Enable.
3. Press or Save soft key to save the configuration.
To configure the DHCP Option 100

1. To press Menu → Settings → Date & Time → DHCP Option 100

2. Select Yes for the DHCP SIP Server

3. Click to save the configuration

To configure the NTP Server by Web interface

1. Login web page.
   Login name: admin, password: admin(default)

2. Setting → Date & Time → NTP Server
3. Fill the value in the blank.

4. Click **SaveSet** to save the configuration.

To change the Time Zone and Date Display Format via Web interface

1. Setting → Date & Time
2. Select the necessary one.
3. Press **SaveSet** to save the configuration.
To change the SIP Date Override Time via Web interface

1. Setting → Date & Time → SIP Date Override Time
2. Select Yes or No for SIP Date Override Time.
3. Click **SaveSet** to save the configuration.
To change the Account via Web interface

1. Setting → Date &Time → Account.

2. Select desired Account.

3. Click [SaveSet] to save the configuration.

To change the Daylight Saving Time via Web interface

1. Setting → Date &Time → Daylight Saving Time

2. Select Disable or Enable or Auto for Daylight Saving Time.

3. Click [SaveSet] to save the configuration.
Note:
If the IP Phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, please contact your system administrator for more information.

Daylight Saving Time
Daylight Saving Time (DST) is the practice of temporary advancing clocks during the summertime so that evenings have more daylight and mornings have less. Typically, clocks are adjusted forward one hour at the start of spring and backward in autumn. Many countries have used the DST at various times, details vary by location. The DST can be adjusted automatically from the time zone configuration. Typically, there is no need to change this setting.

LED Status Setting
The LED Status setting mainly defines the power indicator LED.

To configure LED Status via Web interface:

1. Click Setting→Preference

2. Select Yes or No for Power Status, Ringing Status, Miss Calls Status and Voice Message Status.
3. Click for the setting.

For the LED status description, see: LED Instruction Power Indicator LED

<table>
<thead>

Key as Send

To configure Key as Send via Phone interface:

1. Press Menu →Features → Key as Send

2. Press and key to select the enable choice.

3. Press or Save soft key to save the configuration

To cancel # Key as Send via Phone interface:

1. Press Menu →Features → Key as Send

2. Press and key to select the disable choice.
3. Press or Save soft key to save the configuration

**Network Setting**

Htek IP Phone supports IPv4, IPv6, IPv4&IPv6. They have three modes of Network: DHCP, Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on Web interface, it will show the warning of restart as following.

**IPv4**

If you set IP Mode to IPv4, IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE.

**To configure IPv4 via Phone interface:**

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port → IP Port Mode.

2. Press or to change the IP Port Mode.

3. Press or Save soft key to save the configuration.
To configure IPv4 via Web interface:

1. Click Network → Basic → Internet Port
2. Select IPv4 for Internet Port
3. Click for the setting.

To configure DHCP via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port → IPv4 → DHCP mode.
2. Click Save and restart the phone.

To configure a static IP address via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port → IPv4 → Static mode.
2. Enter the parameters: IP, Netmask, Gateway, Pri.DNS (primary DNS), Sec.DNS (secondary DNS) in the corresponding fields.
3. Click Save and restart the phone.
4. Press the OK soft key to accept the change or the Cancel soft key to cancel. If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. You can set a WAN port to be a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and password.

To configure PPPoE via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port → PPPoE mode.

2. Enter the User ID and password

3. Click Save and restart the phone.

To configure Network via Web interface:
1. Click Network → Basic → IPv4 setting

2. Select the desired Type: DHCP, Static or PPPoE

3. Fill the necessary information.

4. Click **SaveSet** and restart the phone.

**IPv6**

If you set IP Mode to IPv6, IP phone will use IPv6 address. IPv6 has two network modes: DHCP, Static

**To configure IPv6 via Phone interface:**

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port → IP Port Mode.

2. Press or to change the IP Port Mode.

3. Press or Save soft key to save the configuration.
To configure IPv6 via Web interface:

1. Click Network → Basic → Internet Port

2. Select IPv6 for Internet Port

3. Click for the setting.

To configure DHCP via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → WAN Port IPv6 → DHCP mode.

2. Click Save and restart the phone.

To configure a static IP address via Phone interface:

2. Enter the parameters: IP, IPV6 Prefix, Gateway, Pri.DNS (primary DNS), Sec.DNS (secondary DNS) in the corresponding fields.
Basic Setting Configuration

To configure Network via Web interface:

1. Click Network → Basic → IPv6 setting

2. Select the desired Type: DHCP, Static

3. Fill required fields.

4. Click and restart the phone.

3. Click OK and restart the phone.
IPv4&IPv6

If you set IP Mode to IPv4&IPv6, IP phone will support both IPv4 and IPv6 address. The settings of DHCP, Static, and PPPoE are same as above.

To configure IPv4&IPv6 via Phone interface:

1. Press Menu ➔ Settings ➔ Advanced Setting (password: admin) ➔ Network ➔ WAN Port ➔ IP Port Mode.
2. Press ➔ or ➔ to change the IP Port Mode.
3. Press or Save soft key to save the configuration.

To configure IPv4&IPv6 via Web interface:
1. Click Network → Basic → Internet Port

2. Select IPv4&IPv6 for Internet Port

3. Click [SaveSet] for the setting.

Note:
Wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information about these parameters, contact your system administrator.

PC Port

Three modes for PC port: bridge, connect to Expansion Module and router.

To configure PC Bridge via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → PC Port → Bridge mode.

2. Click Save.

3. Click the OK button, then the phone will reboot.

To configure PC router via Phone interface:

1. Press Menu → Settings → Advanced Setting (password: admin) → Network → PC Port → Router mode.

2. Enter the IP, Netmask and DHCP server

3. Click Save.

4. Click the OK button, then the phone will reboot.

To configure PC, Connect to Expansion Module via Phone interface:
1. Press Menu→Settings→Advanced Setting (password: admin)→Network→PC Port→Connect to Module.

2. Click Save.

3. Click the OK button, then the phone will reboot

To configure Bridge via Web interface:

1. Click Network→PC Port

2. Select As Bridge

3. Click and the phone will reboot automatically

To configure Router via Web interface:

1. Click Network→PC Port

2. Select As Router

3. Fill the IP address and other necessary information.

4. Click and the phone will reboot automatically
To configure PC, Connect to Expansion Module via Web interface:

1. Click Network→ PC Port
2. Select Connect to Expansion Module
3. Click SaveSet and the phone will reboot automatically
Contact Setting

This section provides the operating instructions for managing contacts. The topics include:
- Local Directory
- Remote Phonebook
- LDAP
- Search Contact

Local Directory

In the directory, you can add or delete your friends, business partner or anyone others’ phone No., so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

A. To add contacts list into local directory

To add contacts manually via Phone interface
1. Press Menu → Directory → Local Contacts
2. Press Add soft key.
3. Enter the necessary information as Name, Phone number...
4. Press Save soft key or to add the contacts successfully.

To add contacts from history via Phone interface:
1. Press History soft key or press Menu → History → Local History
2. Press and to select the targeted one. (Press and switched
3. Press Option soft key → Add to Contacts

4. Edit the necessary information as Name, Phone number…

5. Press Save soft key or to add the contacts successfully.

To add contacts via Web interface:

1. Click Directory → Directory

2. Enter the name, number and some other information.

3. Press and then press button.
B: To add contacts into blacklist

**To add blacklist manually via Phone interface:**
1. Press Menu → Directory → BlackList
2. Press Group soft key.
3. Press Add soft key.
4. Enter the Name and select the Ring Tone.
5. Press Save soft key or ![Save](image) to add the Group successfully.
6. Enter the added Group, then press Add soft key.
7. Enter the necessary information as Name, Phone number...
8. Press Save soft key or ![Save](image) to add the contacts successfully.

**To add blacklist from history via Phone interface:**
1. Press History soft key or press Menu → History → Local History
2. Press and to select the targeted one.
3. Press Option soft key → Add to Blacklist
4. Edit the necessary information as Name, Phone number…
5. Press Save soft key or to add successfully.

Upload Contacts photo via Web interface:

1. Click Directory and select the desired contact.
2. Click Choose file to select the photo for the contact.
3. Click to upload the photo.
When you place a call from the contact, the phone idle screen will show the contact photo.

Note:
The format of the photo supported is .jpg or .bmp.
To import or export the contact list

You can manage your phone’s local directory via phone or web user interface. But you can only import or export the contact list via Web interface.

To import an XML file of contact list via Web interface:

1. Click on Directory → Directory
2. Click Choose file to select a contact list file (file format must be .xml) from your local system.
3. Click Import XML to import the contact list.

To export an XML file of contact list via Web interface:

1. Click on Directory → Directory
2. Click Export XML to export the contact list.

To import a CSV file of contact list via Web interface:

1. Click on Directory → Directory
2. Click Choose file to select a contact list file (file format must be .csv) from your local system.
3. Click Import Csv to import the contact list.

To export a CSV file of contact list via Web interface:

1. Click on Directory → Directory
2. Click Export Csv to export the contact list.

Note:

Photo size should be less than 2MB, name length should be less than 48 characters.
Remote Phonebook

To set Remote Phonebook via Web interface:

1. Login the Web interface and click Directory→Remote Phone Book

2. Fill the path of the remote file in the Phone Book URL field.
   For example, http://192.168.0.106/Phonebook/Remote_Phonebook/remotephonebook.xml

3. Fill the Name and then click SaveSet to save the configuration.

To check the contacts via Phone interface:

Press Directory→Left Button→Left Button, and you can see the item you set, press Update and then enter you will find the detail.

For More detail, please refer to: www.htek.com

Note:
Every remote phonebook, only supports 1000 contacts.

LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure LDAP via Web interface:
1. Login Web interface and click Directory→LDAP

2. Fill the LDAP Name Filter:
   a) This parameter specifies the name attributes for LDAP searching. The “%” symbol in the filter stands for the entering string used as the prefix of the filter condition.
   b) For example, (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.

3. Fill LDAP Number Filter:
   This parameter specifies the number attributes for LDAP searching.

4. Fill Server Address: Fill the domain name or IP address of the LDAP Server. For example: 192.168.0.9

5. Port (the port of the LDAP Server), Base, User Name, Password

6. Max Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.

7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.

8. Fill the relative value and then click to save the settings.

Following is the example screenshot for the configuration.
To configure LDAP Key via Web interface:

1. Click Function Keys \(\rightarrow\) Line Key \(\rightarrow\) choose Line Key 2 (for example)

2. Select LDAP in the Type field.

3. Click [SaveSet] to save the configuration.

To Configure LDAP Key via Phone interface:

1. Press Menu \(\rightarrow\) Features \(\rightarrow\) Function Keys \(\rightarrow\) Line Keys as Function Keys \(\rightarrow\) Line Key 2

2. Select LDAP in the Type field

3. Press Save or OK key to save the configuration.

When press the LDAP Key, the LCD will display as following:

For More detail, please refer to www.htek.com
Search Contact

You can search contact in all contacts, local contacts, remote contacts and LDAP contact.

To search contact in all contacts:

1. Press Menu → Features → Anonymous Call → Account ID 1
2. Press ▶ and ◀ key to select the enable choice in Rejection field.
3. Press ✅ or Save soft key to save the configuration.
To cancel rejecting anonymous call

1. Press Menu → Features → Anonymous Call → Account ID 1

2. Press ▶ and ◀ key to select the disable choice in Rejection field.

3. Press ◀ or Save soft key to save the configuration.

Call Mute

When you use the Mute feature, the other parties will not hear your voice while you can hear their voice. Call mute applies to all modes (handset, headset, and speakerphone).

To mute the call during a call (including a conference call)
1. Press the Mute key \( \text{M} \), then the Mute key glows green, and the LCD display \( \text{M} \).  

2. To disable the mute function, press \( \text{M} \) again.

**DND**

When you use the DND feature, the phone is to reject all incoming calls automatically and you can see the mute icon \( \text{M} \) shown on the Top of the LCD on idle page.

![DND Icon](image)

**To enable DND feature via Phone interface**

Press the DND soft key when the phone is idle, and then \( \text{M} \) shown on the LCD.

**To disable DND feature via Phone interface:**

Press the DND soft key again, and then there is no \( \text{M} \) on the LCD.

**Hot Line**

**To configure Hot Line via Phone interface**

1. Press Menu →Features → Hot Line

2. Enter the Number and Delay time (as present, we support off hook auto dial).
To configure Hotline auto dial via Web Interface

1. Setting → Features → HotLine.

2. Fill the number in the Hotline Number and Hotline Time-out.

3. Click to save the configuration.

Delete the hotline number and save the configuration, then now the Hotline auto dial is cancelled.

**Auto Redial**

When this option is set, if the phone you call is busy and does not set call waiting or voice mail, your LCD screen will prompt for Auto Redial, as shown in figure.
If you press OK, your LCD will prompt Auto Redial Interval and Auto Redial Times

To configure Auto Redial via Web Interface

1. Click Setting →Features → Auto Redial

2. Select On or Off for Auto Redial.

3. Fill the number 1~300 seconds for the Auto Redial Interval.

4. Fill the number 1~300 times for the Auto Redial Times.

5. Click to save the configuration.

Function Key Features and Settings

The function key supports the Line Label Length, Line Page Indicator, BLF list MODE, line key as cancel:

Line Label Length: if this option is set Long label, then the label’s length will be longer, it
is used if the string is too long.

**Line Page Indicator:** Enable this option When the phone has been configured for four pages and current page is first page, the forth page has a BLF and BLF’s status is changed, then the forth page’s button will flash the red indicator.

---

**Line**

It works same as Line keys.

Line support three Mode (Default, lock and float)

- **Default mode:** If there is an incoming call, the phone won’t navigate to the set line key account page if the line key page is set as line type and current page is page four.

- **Lock mode:** If there is an incoming call the line key set account will reflect on the same position on every page when the first page set as the line type.

- **Float mode:** If there is an incoming call, the phone will navigate to the set line key account page if the line key page is set as line type and current page is page four.

**To configure Line Feature via Web Interface**

1. Click Function Keys → Line Key.

2. Select the wanted Key and set as Line.

3. Select the Account.

4. Click the **SaveSet** button to save the configuration.

---

**Speed Dial**

With this feature, you can dial one number by pressing the configured speed dial key.

**To configure Speed Dial feature via Phone interface**
1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)

2. Press ▶ and ◄ key to select the Speed Dial in the Type field.

3. Enter the targeted Number.

4. Press ☑ or Save soft key to save the configuration
Then the selected Line Key will work as Speed Dial.

**To configure Speed Dial feature via Web Interface**

1. Click Function Keys → Line Key.

2. Select the wanted Line Key and set as Speed Dial.

3. Enter the desired phone number in the Value field.

4. Select the Account ID

5. Click the [Save Set] button to save the configuration.

**BLF**

You can use the BLF (Busy Lamp Field) feature to monitor a specific extension number whether the extension is busy or free.

1. When the extension you are monitoring is idle, the light is steady green.

2. When the monitored extension is ringing, the light is blinking red, press the BLF key to
pick the phone up directly.

3. When the monitored extension is calling or in a conversation, the light is steady red.

**To configure a BLF key via Phone interface**

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example).

2. Select the targeted Line Key.

3. Press ➤ and ◀ key to select the BLF in the Type field.

4. Enter the targeted Value Number.

5. Press ➤ and ◀ key to select the Account ID.

6. Enter the Pickup Code.

7. Press ✈ or Save soft key to save the configuration.

**To configure a BLF key via Web interface**

1. Click Function Keys → Line Key.

2. Select the desired Line Key and select BLF in the Type.

3. Enter the monitored phone number in the Value field.

4. Select the Account ID

5. Fill the Extension.

6. Click ✈ to save the configuration.
Note:
This feature is not available on all servers. For more information, contact your system administrator.
After setting the BLF key, do not need to restart the phone.

Visual Alert for BLF Pickup

If this option is enabled, when you use the BLF feature to monitor a specific phone whether it is busy or free, you can see this message on the LCD, as shown in the following figure.

To configure Visual Alert for BLF Pickup via Web Interface

1. Click Setting → Features → Call Pickup → Visual Alert for BLF Pickup

2. Select Enable or Disable for Visual Alert for BLF Pickup

3. Click to save the configuration.
Audio Alert for BLF Pickup

If this option is enabled, when you use the BLF feature to monitor a specific phone whether it is busy or free, you can hear beep.

To configure Audio Alert for BLF Pickup via Web Interface

1. Click Setting → Features → Call Pickup → Audio Alert for BLF Pickup
2. Select Enable or Disable for Audio Alert for BLF Pickup
3. Click [SaveSet] to save the configuration.

BLF List

To configure BLF List via Web interface:
1. Login and click Account → Basic

2. Fill the Eventlist BLF URL and click SaveSet to save the configuration.

3. To configure BLF List Keys
   
   3.1 Click → Function Keys → Line Key
   
   3.2 Select the BLF List in the Type field.
   
   3.3 Select Account
   
   3.4 Click SaveSet to save the configuration.

For more information, please check on www.htek.com.
Voice Message

This phone supports Voicemail, and when there is a message, the message light will light green. Moreover, when you pick up the handset, or press Speaker key, you will hear some faster busy tone.

To configure the Voice mail feature via Phone interface:

2. Enter the Account No. 1/2/3/4/5/6.../16

3. Press or Save soft key to save the configuration

To configure Voice Mail Line Key via Web Interface:

1. Click Function Keys → Line Key.

2. Select the wanted Key.

3. Enter the desired voicemail feature codes in the Value field.

4. Fill the Label name to be displayed on LCD.

5. Select the Account.

6. Click to save the configuration.
To configure a Voice mail key by Phone interface:

1. Press Menu →Features →Function Keys →Line Keys as Function Keys → Line Key2 (for example).

2. Select the targeted Line Key.

3. Press > and < key to select the Voice Mail in the Type field.

4. Enter the Value.

5. Press > and < key to select the Account ID.

6. Press or Save soft key to save the configuration.

To leave a voice mail:
You can leave a voice mail when the receiver is busy or its inconvenient for them to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

To listen to voice mails:
When the Phone interface prompts receiving new voice mail's icon, the power indicator LED flashes red (Setting->Preference: Enable Voice Message Status) and the voice message button flashes green.

1. Press or the targeted Line Key to dial out the voice mail access code.

2. Follow the voice prompt to listen to voice mail.

To view the voicemail via Phone interface:
The LCD screen displays the amount of new and old voice mails.
Note:
This feature is not available on all servers. For more information, contact your system administrator.
Before listening to voice mails, make sure the voice mail access code has been configured.
When all new voice mails are retrieved, the power indicator LED, voice mail indicator LED and targeted Line Key will go out.

Direct Pickup

With this feature, you can pick up the set line when it ringing.

To configure Direct Pickup feature via Phone interface

1. Press Menu →Features →Function Keys →Line Keys as Function Keys → Line Key2(for example)

2. Press ▶ and ◀ key to select the PickUP in the Type field.

3. Enter the Value.

4. Press ▶ and ◀ key to select the Account ID.

5. Press ‡ or Save soft key to save the configuration

Then the selected Line Key will work as Direct Pickup.
To configure Direct Pickup feature via Web Interface

1. Click Function Keys → Line Key.

2. Select the wanted Line Key and set as Direct Pickup.

3. Enter the desired phone number in the Value field.

4. Select the Account.

5. Click to save the configuration.

Group Pickup

With this feature, you can pick up the specified group that you want incoming calls.

To configure the Pickup via Phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

**To configure the URL record via Phone interface**

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)

2. Press → and ← key to select the URL Record in the Type field.

3. Fill the Value.

4. Press or Save soft key to save the configuration

**To configure the record via Web Interface**

1. Click Function Keys → Line Key.

2. Select the desired Line Key and select URL Record in the Type.

3. Fill the Value.

4. Click the **SaveSet** button to save the configuration.
Paging

With this feature, you can call a paging group directly.

To configure the paging via Phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key 2 (for example)

2. Press  and  key to select the Paging in the Type field.

3. Enter the paging code followed the number.

4. Press  and  key to select the Account ID.

5. Press  or Save soft key to save the configuration

To configure the Paging via Web interface

1. Click Function Keys → Line Key.

2. Select the desired Line Key and select Paging in the Type.

3. Enter the paging code followed the number.

4. Select the Account.

5. Click the Save button to save the configuration.

Shared Line

Htek IP Phone supports “Share Call Appearance” by Broadsoft and XCast standard. This feature allows members of the SCA group to share SIP lines and provides status monitoring (idle, active, progressing, hold) of the share line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered in the group.

All the users that belong to the same SCA group will be notified by visual indicator when a
user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold. When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable share call appearance, the user would need to register the share line account on the phone. In addition, they would need to navigate to “Account” -> “Advanced” on the webpage and set the line to “Share Line” and “SIP Server Type”, and configure the line key or Line Key as “line” type with the desired account on webpage or LCD. If the user requires more share call appearances, the user can configure multiple line keys (Function Keys->Line key) to be “line” type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on share line can be placed on hold or barged in.

**To configure the line key as line via Phone interface**

1. Press Menu →Features →Function Keys →Line Keys as Function Keys → Line Key2(for example)
2. Press ▶ and ◀ key to select the Line in the Type field.
3. Press ▶ and ◀ key to select the Account ID.
4. Enter the Label
5. Enter the Value
6. Press ► or Save soft key to save the configuration

**To configure the line key as line via Web Interface**
1. Click Function Keys → Line Key.

2. Select the desired Line Key and select Line in the Type.

3. Enter the Value.

4. Enter the Label.

5. Select the Account.

6. Click the **Save** button to save the configuration and then restart.

**Note:**
This feature is not available on all servers. For more information, contact your system administrator.

### Public Hold

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

**To configure the Public hold via Phone interface**

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)

2. Press and key to select the Public Hold in the Type field.

3. Press or Save soft key to save the configuration.

**To configure public hold via Web Interface**

1. Click Function Keys → Line Key.

2. Select the desired Key and select Public Hold in the Type.

3. Click the **Save** button to save the configuration.
Private Hold

The key can be configured as a private hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold the call, but only the initiator can resume the call.

To configure the Private hold via Phone interface

1. Press Menu →Features →Function Keys →Line Keys as Function Keys → Line Key2 (for example)
2. Press ➔ and ➔ key to select the Private Hold in the Type field.
3. Press ⊗ or Save soft key to save the configuration

To configure private hold via Web Interface

1. Click Function Keys → Line Key.
2. Select the desired Key and select Private Hold in the Type.
3. Click the Save button to save the configuration.
Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where all employees are not in the office at the same time, or not in the office for a very long time, which means their personal offices are often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, which allows many users to share the phone resource in different times. To use this feature, first you need to configure a Hot Desking key in the advance settings.

This feature is supported on the version 1.0.3.82 or later

To configure the hot desking via Phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)
2. Press ▶ and ◀ key to select the Hot Desking in the Type field.
3. Enter the display name in the Label field.
4. Press CONF or Save soft key to save the configuration

To configure the hot desking via Web interface:

1. Click Function Keys → Line Key.
2. Select the desired Key and select Hot Desking in the Type.
3. Select the desired account from the pull-down list of Account field.
4. Click the SaveSet button to save the configuration.

To use the hot desking feature on the user interface:

1. Press the Hot Desking key when the IP Phone is idle.
2. Enter the Extension number and password
3. Click Save soft key
You can see the account information which has changed.
Note:
This feature is not available on all servers. For more information, contact your system administrator.

ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of the different personnel at the earliest point. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, first you should configure an ACD key in the advance settings.

To configure the ACD via Phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example)
2. Press > and < key to select the ACD in the Type field.
3. Enter the label in the Label field.
4. Select the desired account in the Account ID field.
5. Press or Save soft key to save the configuration

To configure the ACD via Web interface:

1. Click Function Keys → Line Key.
2. Select the desired Key and select ACD in the Type.
3. Enter the label in the Label field.
4. Select the desired account from the pull-down list of Account field.
5. Click the button to save the configuration.

Note:
This feature is not available on all servers. For more information, contact your system administrator.
Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later.

To configure the zero touch via Phone interface:

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key2 (for example).
2. Press >> and << key to select the Zero Touch in the Type field.
3. Press ☐ or Save soft key to save the configuration.

To configure the zero touch via Web interface:

1. Click Function Keys → Line Key.
2. Select the desired Key and select Zero Touch in the Type.
3. Click the button to save the configuration.

To use the zero touch feature on the user interface:

1. Press the Zero Touch key when the IP Phone is idle.
2. Press the OK soft key and the IP Phone will enter the WAN Port interface; you can change the WAN Type by pressing the Navigation keys.
3. Press the Next soft key to enter Network interface, then you can configure some information.
4. Press the Next soft key again, you can configure auto provision information.
5. When you finish the setting, you can press the OK to accept the changes.

Note:
This feature is not available on all servers. For more information, contact your system administrator.
Multicast Paging

You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address/addresses without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address/addresses without involving SIP signaling. You can specify up to 10 multicast listening addresses.

Sending RTP Stream

To configure a multicast paging key via Phone interface

1. Press Menu →Features →Line Key →Line Key2 (e.g.)

2. Press > and < or switch key to select the Multicast Paging in the Type field.

3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
   The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Press or Save soft key to save the configuration

To configure a multicast paging key via Web interface

1. Function Keys->Line Key
2. Select the desired Key and select Multicast Paging in the Type.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
   The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Click the button to save the configuration.

Sending RTP Stream:

Press the Multicast Paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP:Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP:Port). For
both sending and receiving of the multicast RTP, there is no SIP signaling involved. The multicast paging key LED illuminates solid green.

### Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address addresses without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network. How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

#### Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:
- 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- Disabled: The voice call in progress will take precedence over all incoming paging calls.

#### Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

#### Multicast Codec:

You can only configure the codec by Web interface.

**To configure multicast codec key via Web interface**

1. Click Directory ->Multicast Paging:
2. Select the desired codec from the pull-down list of Multicast Codec
3. Click the button to save the configuration.

**To configure multicast listening addresses via Web interface:**

2. Select the desired value from the pull-down list of Paging Barge.
3. Select the desired value from the pull-down list of Paging Priority Active.
4. Enter the multicast IP address/addresses and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
5. Enter the label in the Label field.
6. Click [SaveSet] button to save the configuration.

Note:
The priorities of listening to multicasting addresses can be predefined: 1 being the highest priority, 10 with the lowest in priority order. Both the multicast paging sender and receiver’s phones play a warning tone when establishing a multicast paging call. Listening to Multicasting addresses can be configurable via Web interface only.

Upgrade

Factory Reset

To set Factory Reset by Phone interface

1. Press Menu → Settings → Advanced Setting (default password: admin) → Phone Setting → Factory Reset
2. Press OK soft key in the warning page.

To set Factory Reset via Web interface

1. Click Management → Upgrade
2. Click **Reset To Factory** and then confirm the setting.

Pcap Feature

To use pcap via Web interface:

1. Click Management → Tools

2. Click Start and then operation the phone

3. When finish the operation, click Stop and then click Export.

4. Then you'll get the Pcap captures.
System Log

To download system log via Web interface:

1. Click Management → Configuration

2. Click Download of the system Log

3. Then you’ll get a txt file: syslog.tgz.

Upgrade

To upgrade via HTTP, the “Management”→ “auto provision” → “Firmware Upgrade”→ “Upgrade Mode” field needs to be set to HTTP, respectively. “Firmware Server Path” needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL:
- e.g. firmware.mycompany.com:5688/Htek
- e.g. www.mycompany.com:5688/fm/ Htek
- e.g. 218.2.83.110

Instructions for firmware upgrade via HTTP:
(1) End users can choose to download the free HTTP server from http://httpd.apache.org/ or use Microsoft IIS web server. Then setup HTTP server.
(2) Unzip the firmware file and put all of them under the root/fm directory of the HTTP server.
(3) Visiting “http://192.168.0.254/fm/fw924.rom on localhost by browser” to verify the HTTP Server. If visiting “http://192.168.0.254/fm/fw924.rom on another computer and it not prompted to download fw924.rom file on this computer, please check if the firewall is on or off (Suggest you turn off the firewall).

To configure the server path via Web interface:
1. Click Management→Auto provision:

2. Select the upgrade mode in the Upgrade Mode field

3. Enter the Firmware Server Path and Config Server Path (192.168.0.254 is HTTP server).

4. Enter the HTTP server’s username and password (optional).

5. Click the Save button to save the configuration.

6. Restart the UC924, IP Phone will restart and auto-get firmware files from HTTP server.

NOTES:

- Htek recommends end-user use the Htek HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.

- Once a “Firmware Server Path” is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC924 will attempt to retrieve the new image files by downloading them into the UC924’s SDRAM. During this stage, the UC924’s LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC924 will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minute if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.

- Htek’s latest firmware is available at [www.htek.com → Support → Document & Firmware].

- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

**To upgrade manually via the Web configuration interface**

1. Click Management → Upgrade

2. Click Choose file or the blank.

3. Select the firmware (fw924.rom) and then click Upgrade.

**Configuration File**

*To download configuration file:*

1. Click Management → Configuration → Configure File

2. Click the Download Xml File or Download Bin File, then you can get a file: cfg.bin or cfg.xml
To Restore a configuration file:

1. Click Management → Configuration → Configure File

2. Select the xxx.bin or xxx.xml file, and then Click the Restore Xmx Configuration or Restore Bin Configuration, then IP Phone will reboot.
Troubleshooting

Why is the phone LCD screen blank?

- Ensure your phone is properly plugged into a functional AC outlet.
- Ensure that the phone isn’t plugged into a plug controlled by a switch that is off.
- If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- Check if the power LED is on to ensure that the phone is powered on.

Why does the phone display “Network Unavailable”?

To resolve:

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is functioning well.
- If the problem still persists, contact your system administrator for more information.

Why can’t I get a dial tone?

To resolve:

- Check for any loose connections and that the phone has been installed properly. For the installation instructions, refer to the phone installation section.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if you have) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Where to set the tone?

You can set the tone on Web interface:

- Click Setting ➔ Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- For More Click Tone Notes.
How to download XML Configuration?

- Click Management → Configuration → Download XML File
