No parts shall have the right to alter, modify or use as commercial means without prior written permission from Nanjing Hanlong Technology Co., LTD.

## Safety Instructions

- To use the Phone, please follow the instructions in this user manual.
- Use the power adapter supplied with your phone. Other power adapters may damage the phone.
- This phone is only for indoor use. And also avoid in high humidity, water and some other liquids.
- Do not use the phone during thunderstorms.
- CE
- FCC

## WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

## Cleaning

To clean the device, use an anti-static cloth. Please avoid cleaning liquids as they might damage the surface or internal electronics of the phone.

## FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

## Summary of changes

This section describes the changes to this user manual for each release and user manual version.

### Change for Release x.0.4.0.10, Manual version x.0.4.0.10

Major updates have occurred to the following sections:

- [Label Scroll](#)

### Change for Release x.0.4.0, Manual version x.0.4.0

Major updates have occurred to the following sections:

- [IPv6](#)
- [IPv4&IPv6](#)

### Change for Release x.0.3.98.O, Manual version x.0.3.98.O

Major updates have occurred to the following sections:

- [Reboot in Talking](#)

### Change for Release x.0.3.98.A, Manual version x.0.3.98.A

Major updates have occurred to the following sections:

- [Auto Logout Time](#)

### Change for Release x.0.3.98, Manual version x.0.3.98

Major updates have occurred to the following sections:

- [Daylight Saving Time](#)

### Change for Release x.0.3.93, Manual version x.0.3.93

Major updates have occurred to the following sections:

- [Check-Syn With Authenticate](#)
- [Call Back](#)

## Change for Release x.0.3.88, Manual version x.0.3.88

Major updates have occurred to the following sections:

- [Detect IP Conflict](#)

## Change for Release x.0.3.72, Manual version x.0.3.72

Major updates have occurred to the following sections:

- [Voice Mail Tone](#)
- [Backup NTP Server](#)
- [Intercom Barge](#)

## Change for Release x.0.3.65, Manual version x.0.3.65

Major updates have occurred to the following sections:

- [Redial Mode](#)

## Change for Release x.0.3.63, Manual version x.0.3.63

Major updates have occurred to the following sections:

- [Suppress DTMF Display](#)
- [Suppress DTMF Display Delay](#)

## Change for Release x.0.3.62, Manual version x.0.3.62

Major updates have occurred to the following sections:

- [Auto Redial](#)

# Getting Started

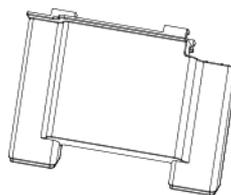

## Packing List

The package contains the following parts, please check if all the items are not missed:

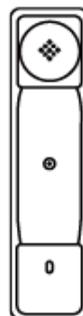

1. The phone device

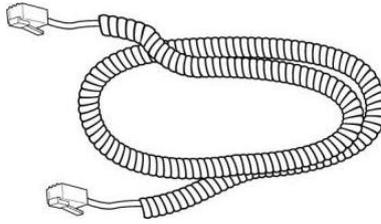

2. The footstand

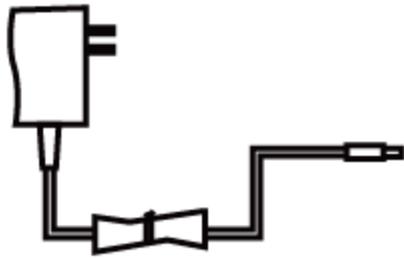

3. Handset

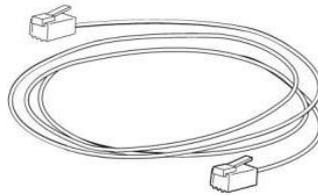

4. Headset cord

5. Power adapter

6. Ethernet cable

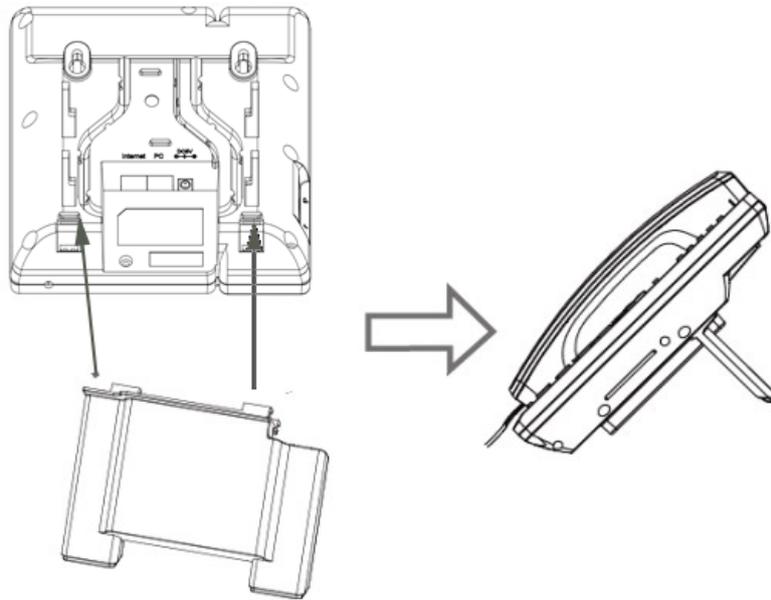

7. Quick installation reference

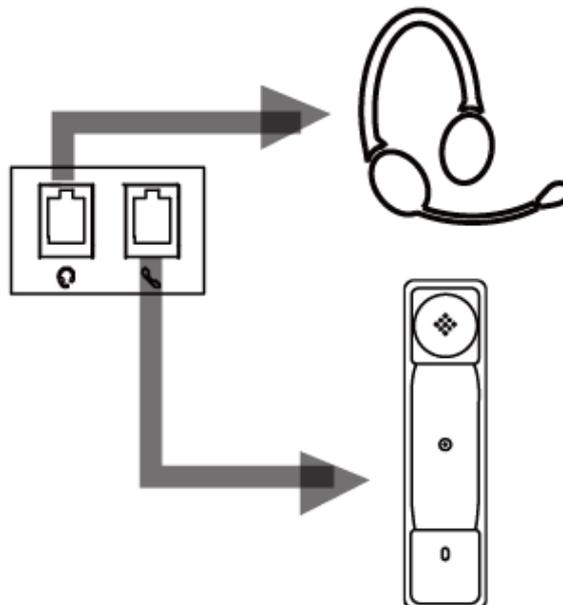

## Phone Installation

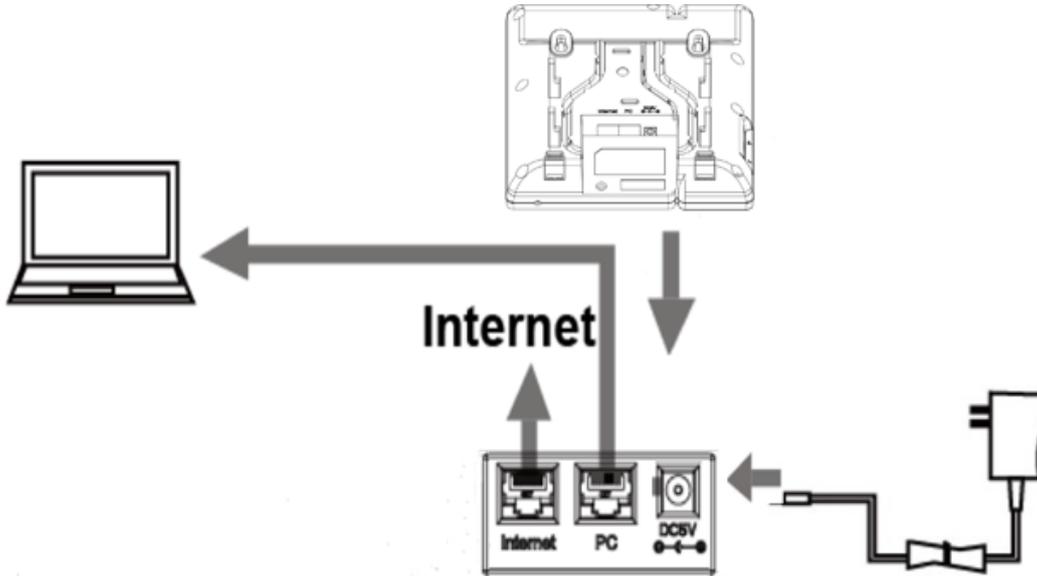

### 1. Attach the Foot stand

### 2. Connect the Handset and optional Headset

### 3. Connect the Network and Power

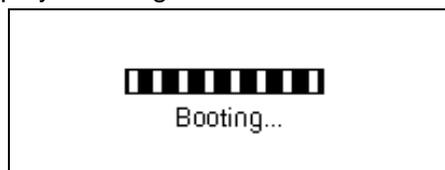

### Initialization

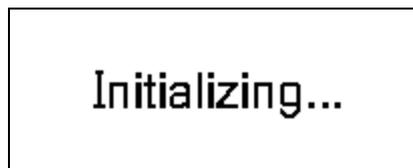

After your phone has been powered up, the system boots up and performs the following steps:

#### Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing" during the initialization.

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show "Check firmware, please waiting..." after initialization.

## Check firmware Please wait

Then IP Phone will show Reboot information:

## Device Reboot Please wait...

By default the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

## Status

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information(e.g., Model, IP, MAC, Firmware, Hardware), Network(e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS... )Account (e.g., register status of accounts)

**To view the phone status via phone interface:**

1. Press Menu →Status →Information

```
1.Model:UC912
2.IPV4:192.168.1.149
3.MAC:00:1f:c1:1c:34:e6
Back
```

2. Press Menu →Status →Network

```
1.WAN:DHCP mode
2.IP:192.168.1.149
3.Mask:255.255.254.0
Back
```

3. Press Menu →Status →Accounts

1.824:Registered  
2.Empty:Not Registered

Back

**To view the phone status via Web interface:**

1. Login webpage (For How to login, please refer to [Web Login](#))
2. View the information of Version, Account and Network.

Shows the running time after device power up.

**Restart:**  
Restart the voip application

## Registration

To register via phone interface :

1. Press Menu → Setting → Advanced settings (default password: admin) → Accounts
2. Select the desired account
3. Select Enable for Account active
4. Filled the SIP Server
5. Filled the Failover SIP server if need (Optional)
6. Filled the Outbound Proxy (Optional)
7. Filled the SIP User ID, Authenticate ID
8. Filled the password, Name (shown on LCD) and Ringtone.
9. Press Save to save the configuration.

**Note:**

If there is a port of sip server, you need to press “1” on the keypad, then you will find the “.”.

**Additional Information:**

When the current input method is ABC/abc/2ab,

Pressing “1”, you will find “, . ?:;”

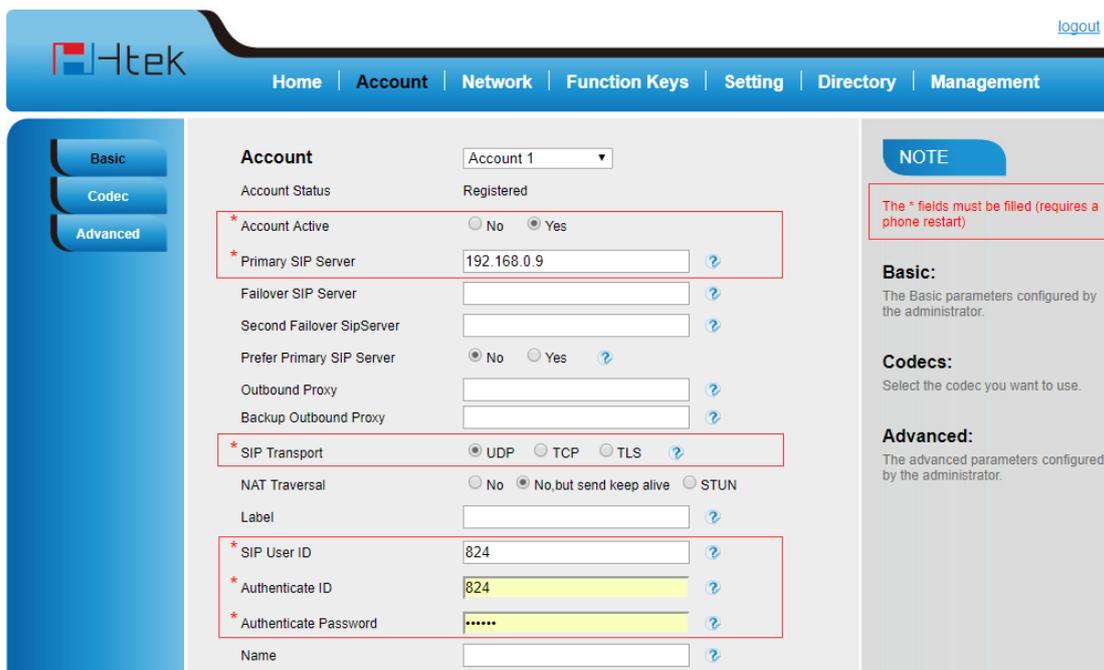

Pressing “0”, you will find “ < > ( ) { } [ ] ”

Pressing “\*”, you will find “\* / ! @ \$ ”

Pressing “#”, you will find “# % & \* | ”

**To register via web interface:**

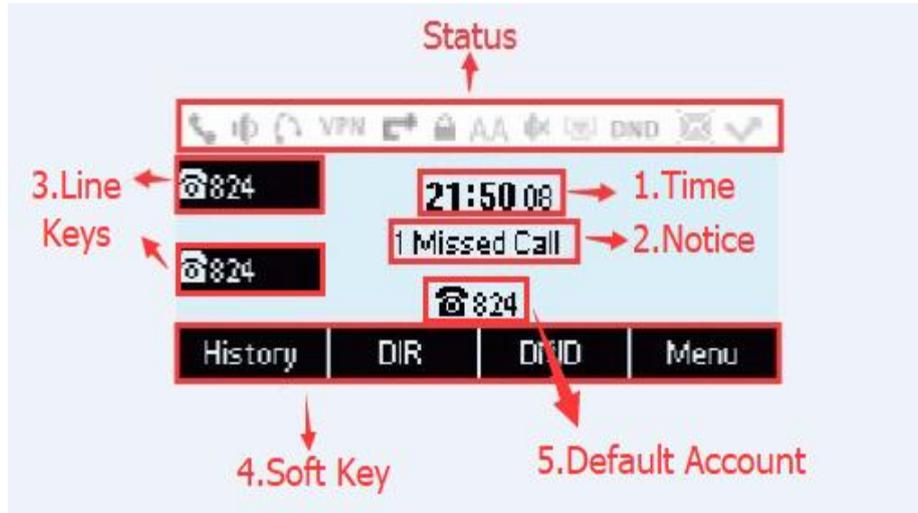

1. Login webpage and Click Account → Basic
2. Select the desired Account
3. Select Yes for Account Active
4. Filled the Primary SIP SERVER and other account information
5. Click  to save the configuration.

**Note:**

1. All fields with \* must be filled. If changed, it requires a phone restart.
2. Account Status says the account registered successfully or not.
3. When change the account information via phone, it will shown Restart note when back to idle page.

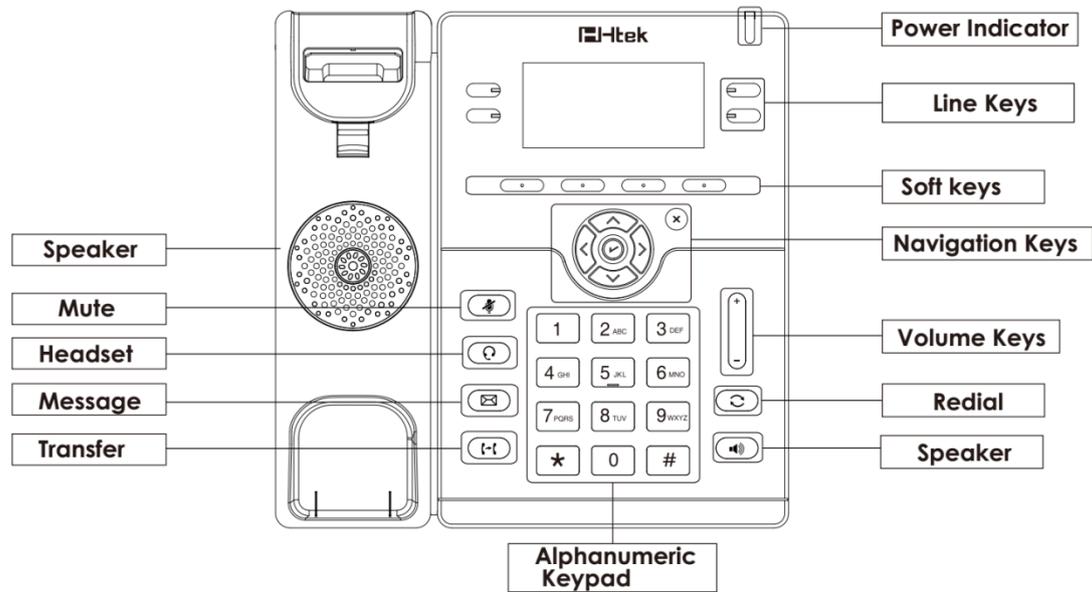

## Idle Screen

Name	Description
1. Date& Time	It shows the phone's time & date. For Date& time setting, see <a href="#">Time&amp;Date</a>
2. Notice	It shows the phone features status, More see <a href="#">Icon Preview</a>
3. Line Keys	This area shows the four line key labels. Line keys are also can be used as other function keys. For more information you can refer to <a href="#">Line Keys</a>
4. Soft Key	This area shows the soft key labels. The default soft key labels are "History", "Directory", "DND" and "Menu". More to see <a href="#">Programmable Key</a>
5. Default Account	This shows the current use account. User can   use to change the default use account.

# Getting Familiar with Your Phone

## LED Instruction

This part mainly instructs the LED status. The Power LED Status describe on the premise that the LED setting all set as Yes. For LED status setting, please refer to: [LED Status Setting](#)

## Power Indicator LED

LED Status	Description
Blinked green	Ringing or have missed call
Steady Green	Idle status(Power on)
Off	Powered off.

## Line LED:(Line Key set as Line)

LED Status	Description
Steady Green	Hold

Steady Green	Off hook or during a conversation.
Blinked red	Ringing.
Off	Idle status

### BLF or BLF List Key LED :( Line Key set as BLF)

LED Status	Description
Steady Green	Idle status for the monitored line
Steady Red	The monitored line is calling or during a call
Blinked red	The monitored line is ringing.
Off	All other unknown status

### Shared Line Key LED:

LED Status	Description
off	Idle status
Stay green	a member of the SCA group in off-hook status
Stay red	Other member of the SCA group's led status when a member of the SCA group in off-hook status
Blinked green every 500ms	a member of the SCA group in Private hold status.
Stay red	Other member of the SCA group's led status when a member of the SCA group in Private hold status
Blinked green every 500ms	a member of the SCA group in public hold status
Blinked red every 500ms	Other member of the SCA group's led status when a member of the SCA group in public hold status
Blinked green every 500ms	a member of the SCA group in progressing status

Stay red	Other member of the SCA group's led status when a member of the SCA group in progressing status
Blinked red every 100ms	Alerting
Stay green	a member of the SCA group in active status when there is an incoming call designated for the SCA group
Stay red	Other member of the SCA group's led status when a member of the SCA group in active status

## Other Key Led

Key	Description
Headset Key	When use in headset mode, the led is steady green or the LED is off.
Message Key	Blinked green when there is new messages or the LED is off.
Mute Key	Red when the mute the call, or the LED is off.

## User Interface

There are two ways to customize specific configurations on your IP phone:

- The user interface on the IP phone
- The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

**Account Status:**  
Shows the registered status of accounts.

**Network:**  
Shows the detail information of WAN port and LAN port.

**System Up Time:**  
Shows the running time after device power up.

**Restart:**  
Restart the voip application

**Note:**

The PC and phone should be in the same segment.  
 When register the accounts in web and the server port is not "5060", then "SIP Server" should be set as "SIP Server's IP address: server port.", for example, "192.168.0.122: 5090".

## Administrator Password

The password is mainly used for login the web interface or set the advanced settings through phone interface. And the default password of the administrator is: **admin**

### To change to password via Phone Interface

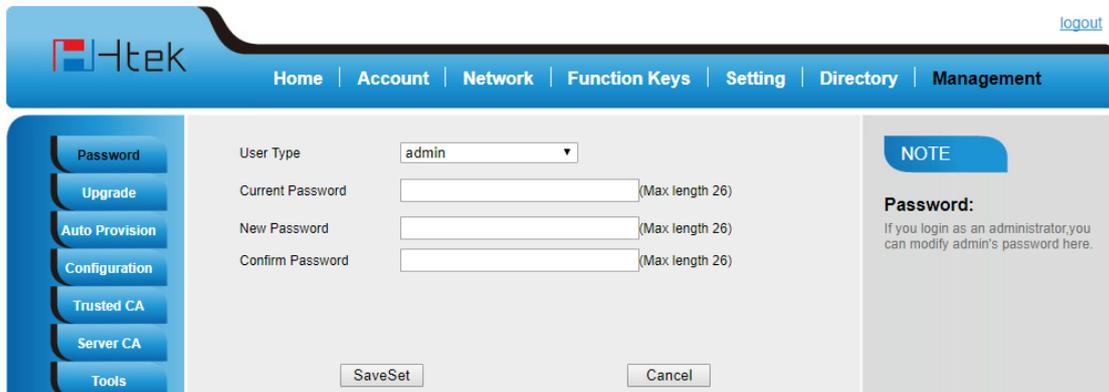

1. Press Menu → setting → Advanced settings → password (default admin) →  
 Phone Setting → Set Password
2. Enter the current PWD (password), new password and confirm the new password.
3. Press save soft key or to save the new password.

```

1.Current PWD: |
2.New PWD:
3.Confirm:
Cancel 2aB Delete Save
    
```

**To change to password via Web Interface**

1. Management → Password
2. Fill the value
3. Click  to save the configuration.

**Note:**  
 When you use the web interface: user name: admin      password: admin(default)

## Language

The default Phone interface language is English.

**To change the language via Phone interface**

1. Press Menu → Setting → Basic Settings → Language.
2. Press  or Save soft key to save the configuration.

```

 1.English(English)
 2.Français(French)
 3.Deutsch(German)
Cancel Save
    
```

### To change the language via Web Interface

1. Setting → Preference → Web Language
2. Select the necessary one.
3. Press  to save the configuration.

#### Note:

All languages may not be available for selection. The available languages depend on the language packs currently loaded to the IP phone.

## Screen Saver

There are two types of screen saver: Backlight off, Time & Logo .

### To enable screen saver via Phone

1. To press Menu → Setting → Basic Setting → Screensaver...
2. Press  and  or press Switch soft key to Choose the Time-out as 1 min or 2/5/10/30 minute, then press the Save button.
3. Enter the Screensaver Type to choose one of the type: Logo only, Time & Logo.
4. Press  or Save soft key to save the selected configuration.

### To disable screen saver via Phone

1. To press Menu → Setting → Basic Setting → Screensaver...
2. Press  and  or press Switch soft key to Choose the Time-out as off.

3. Press  or Save soft key to save the selected configuration.

**To Enable screen saver via Webpage**

1. To Click Setting → Preference
2. To choose the Time-out as 1 min or 2/5/10/30 minute.
3. To select the screen Type as Backlight off or time & logo.
4. Click Saveset to save the configuration.

**To Disable screen saver via Webpage**

1. To Click Setting → Preference
2. To choose the Time-out as Off
3. Click Saveset to save the configuration.

The screenshot shows the Htek web interface with the 'Preference' menu selected. The settings are as follows:

Web Language	English
LCD Language	English
Keypad DTMF Tone	<input checked="" type="radio"/> On <input type="radio"/> Off
Handfree AGC	<input type="radio"/> Disable <input checked="" type="radio"/> Enable
Volume Amplification	
HandSet Send Volume	0dB default
HeadSet Send Volume	0dB default
HandFree Send Volume	0dB default
Screen Time Out	off
Text Logo	
ScreenSaver Type	time & logo

The screenshot shows the Htek web interface with the 'Preference' menu selected. The settings are as follows:

Web Language	English
LCD Language	English
Keypad DTMF Tone	<input checked="" type="radio"/> On <input type="radio"/> Off
Handfree AGC	<input type="radio"/> Disable <input checked="" type="radio"/> Enable

HeadSet Send Volume	0dB default
HandFree Send Volume	0dB default
Screen Time Out	off
Text Logo	
ScreenSaver Type	time & logo

**NOTE**  
**ScreenSaver Photo:**  
 You can only upload screen photos in format of '.bmp' and '.jpg'.

**To custom text logo via web interface:**

1. Click Setting→Preference.
2. choose the Time-out as 1 min or 2/5/10/30 minute.
3. Enter the desired value in the Text Logo field.
4. Click Saveset to save the configuration.

Screen Time Out	1 min	<div style="border: 1px solid red; padding: 5px; background-color: yellow;">                     it will work when screensaver type is time &amp; logo or logo only, and ";" represents the newline                 </div>
Text Logo	welcome	

Screen Time Out	1 min	<div style="border: 1px solid red; padding: 5px; background-color: yellow;">                     it will work when screensaver type is time &amp; logo or logo only, and ";" represents the newline                 </div>
Text Logo	welcome	

### To wake up screen saver via Web interface:

1. Click Setting → Preference
2. Choose Dial First Digit: Screensaver Wakes up or Screensaver Wakes up and Dial

Dial First Digit	<input checked="" type="radio"/> Screensaver Wakes up <input type="radio"/> Screensaver Wakes up and Dial
------------------	--

## Gray Level

There are 12 levels. you can change the LCD's brightness according to your visual perception

### To change the gray level via Phone

5. To press Menu → Setting → Basic Setting → Gray level
6. Press  and  or press Switch soft key to Choose the level from 1 to 20
7. Press  or Save soft key to save the selected configuration

## Time and Date

The time and date show on the idle page, and it can be set and change by SNTP server automatically or manual setting.

### To configure the time and Date by SNTP setting

1. To press Menu → Setting → Basic setting → Time & Date → SNTP Settings
2. Press  or , or info soft key to change the Time zone.

3. Fill the NTP server1, NTP Server2, and Daylight Saving.
4. Press  or Save soft key to save the configuration.

### To configure time and date manually

1. To press Menu → Setting → Basic setting → Time & Date → Manual Settings
2. Press  and  or change the right time, or you can input the right time.
3. Press  or Save soft key to save the configuration.

### To configure the Time & Date Format

1. To press Menu → Setting → Basic setting → Time & Date Format
2. Press  and  or press Info to change between 12 Hour or 24 Hour.
3. Press  and  or press Info to change among Y-M-D(year-month-day), M-D-Y(month-day-year), D-M-Y(day-month-year).
4. Press  or Save soft key to save the configuration.

### To configure the DHCP time

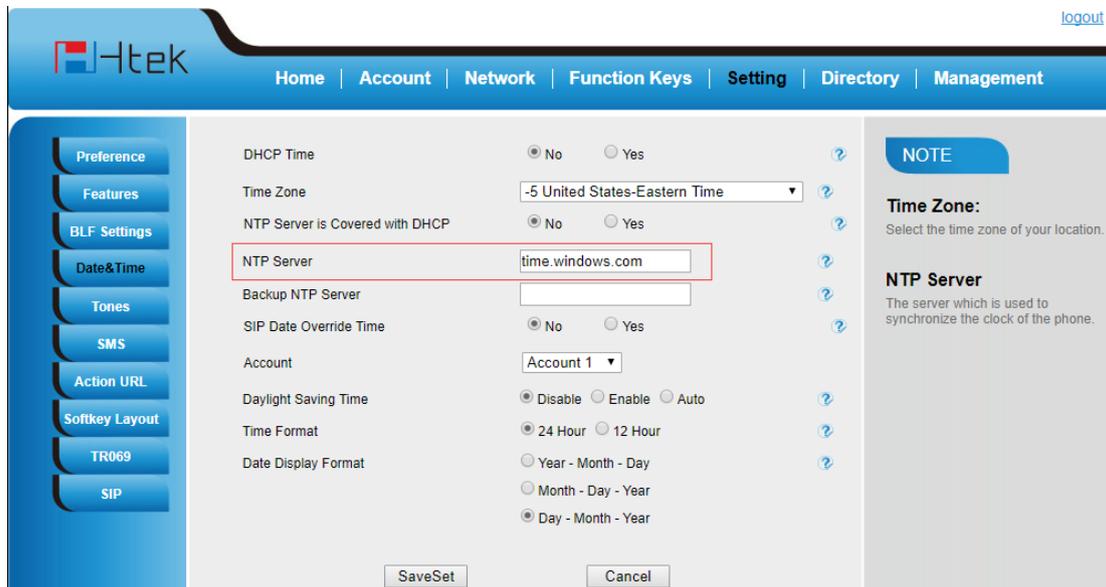

1. To press Menu → Setting → Basic setting → DHCP time
2. Press  and  or press Info to change between Disable and Enable.
3. Press  or Save soft key to save the configuration.

### To configure the NTP Server by web interface

1. Login
  - a) Login name: admin, password: admin (default)

2. Setting → Date &Time →NTP Server

3. Fill the value in the blank.

The screenshot shows the Htek web interface with the 'Setting' menu selected. The 'Date & Time' configuration page is displayed. The 'NTP Server' field is highlighted with a red box and contains the text 'time.windows.com'. Other visible settings include 'Time Zone' set to '-5 United States-Eastern Time', 'DHCP Time' set to 'No', and 'NTP Server is Covered with DHCP' set to 'No'. A 'NOTE' section on the right explains the 'Time Zone' and 'NTP Server' settings.

### To change the Time Zone and Date Display Format via web interface

1. Setting → Date &Time

2. Select the necessary one.

3. Press  to save the configuration.

The screenshot shows the Htek web interface with the 'Date & Time' settings page. The 'SIP Date Override Time' option is highlighted with a red box, and the 'Time Zone' dropdown is also highlighted. The 'SaveSet' button is visible at the bottom.

### To change the SIP Date Override Time via web interface

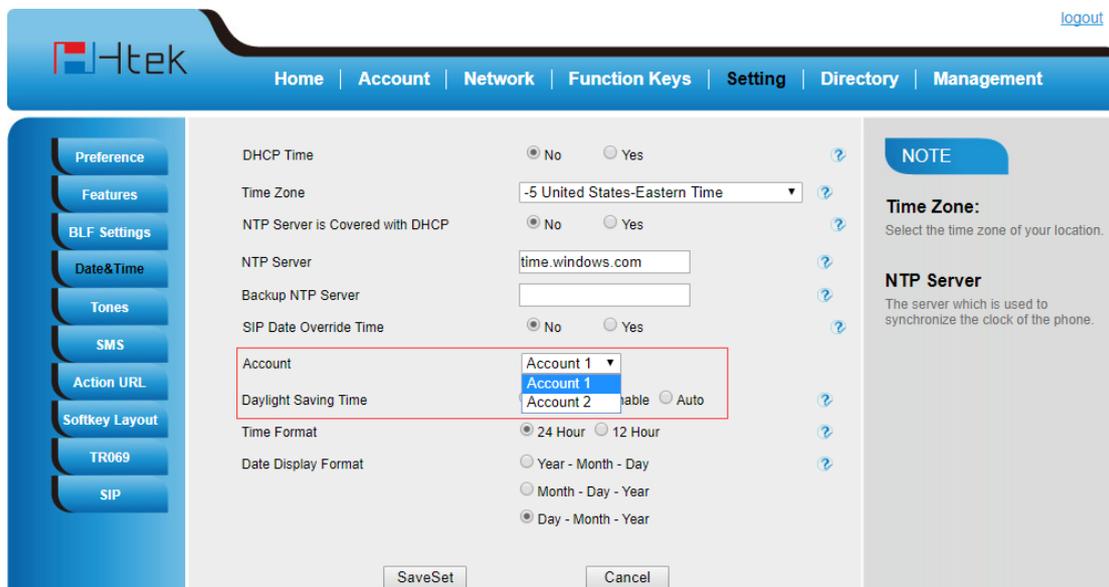

1. Setting → Date & Time → Account
2. Select On or Off for SIP Date Override Time .
3. Click  to save the configuration.

The screenshot shows the Htek web interface with the 'Date & Time' settings page. The 'SIP Date Override Time' option is highlighted with a red box, and the 'Account' dropdown is also highlighted. The 'SaveSet' button is visible at the bottom.

### To change the Account via web interface

1. Setting → Date & Time → Account.

2. Select desired Account.
3. Click  to save the configuration.

The screenshot shows the Htek web interface with the following elements:

- Header:** Htek logo and navigation tabs: Home, Account, Network, Function Keys, Setting, Directory, Management. A "logout" link is in the top right.
- Left Sidebar:** A vertical menu with buttons for Preference, Features, BLF Settings, Date & Time (highlighted), Tones, SMS, Action URL, Softkey Layout, TR069, and SIP.
- Main Content Area:** Configuration settings for Date & Time.
  - DHCP Time:  No  Yes
  - Time Zone: -5 United States-Eastern Time
  - NTP Server is Covered with DHCP:  No  Yes
  - NTP Server: time.windows.com
  - Backup NTP Server: (empty field)
  - SIP Date Override Time:  No  Yes
  - Account: Account 1 (dropdown menu, highlighted with a red box)
  - Daylight Saving Time: (dropdown menu, highlighted with a red box)
  - Time Format:  24 Hour  12 Hour
  - Date Display Format:
    - Year - Month - Day
    - Month - Day - Year
    - Day - Month - Year
- Right Sidebar:** A "NOTE" section with the following text:
  - Time Zone:** Select the time zone of your location.
  - NTP Server:** The server which is used to synchronize the clock of the phone.
- Buttons:** "SaveSet" and "Cancel" buttons are located at the bottom of the main content area.

### To change the Daylight Saving Time via web interface

1. Setting → Date & Time → Daylight Saving Time
2. Select Disable or Enable or Auto for Daylight Saving Time.
3. Click  to save the configuration.

## Key as Send

### To configure Key as Send

1. Press Menu → Features → Key as Send
2. Press  and  or press info/switch soft key to select the enable choice.
3. Press  or Save soft key to save the configuration

### To cancel # Key as Send

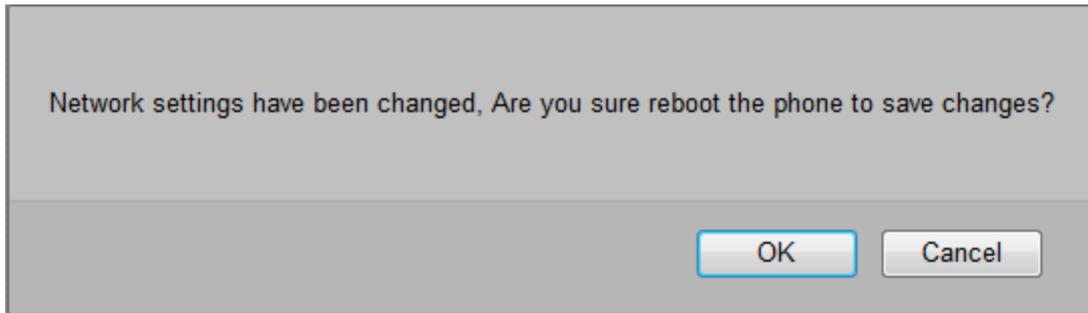

1. Press Menu → Features → Key as Send
2. Press  and  or press info/switch soft key to select the disable choice.
3. Press  or Save soft key to save the configuration.

## Network Setting

Htek IP Phone supports IPv4、IPv6、IPv4&IPv6.They have three mode of Network: DHCP, Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on webpage, it will show the warning of restart as following.

## IPv4

If you set IP Mode to IPv4, IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE

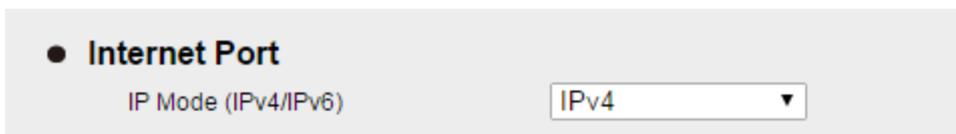

### To configure IPv4 via phone interface:

1. Press Menu → Setting → Advanced Settings (password: admin) → Network → WANPort → IP Port Mode.
2. Press  or  to change the IP Port Mode..
3. Press  or Save soft key to save the configuration.

### To configure IPv4 via Web interface:

1. Click Network → Basic → Internet Port
2. Select IPv4 for Internet Port
3. Click  for the setting.

### To configure DHCP via phone interface:

1. Press Menu → Setting → Advanced Settings (password: admin) → Network → WAN Port IPv4 → DHCP mode.

2. Click Save and restart the phone.

**To configure a static IP address via phone interface:**

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IPv4 →Static mode.
2. Enter the parameters: IP, Netmask, Gateway, Pri. DNS(primary dns), sec. DNS(second DNS) in the corresponding fields.

1.IP: 192.168.1.149
2.Netmask: 255.255.254.0
3.Gateway: 192.168.0.2
Cancel    123    Delete    Save

3. Click Save and restart the phone.

NOTE			
System will restart, Are you sure ?			
Cancel			OK

Press the Save soft key to accept the change or the Cancel soft key to cancel. If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. You can set a WAN port to be a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and password.

**To configure PPPoE via phone interface:**

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →PPPoE mode.
2. Enter the User ID and password
3. Click Save and restart the phone.

1.User ID: 02584685230
2.Password: xxxxxxxx
Cancel    2aB    Delete    Save

**To configure Network via web interface:**

1. Click Network→Basic→IPv4 setting
2. Select the desired Type: DHCP, Static or PPPoE
3. Filled the necessary information.
4. Click the SaveSet and restart the phone.

## IPv6

If you set IP Mode to IPv6, IP phone will use IPv6 address. IPv4 has two network modes: DHCP, Static

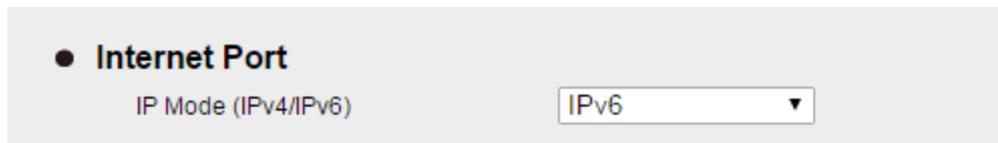

### To configure IPv6 via phone interface:

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IP Port Mode.
2. Press or to change the IP Port Mode..
3. Press or Save soft key to save the configuration.

### To configure IPv6 via Web interface:

1. Click Network→Basic→ Internet Port
2. Select IPv6 for Internet Port
3. Click  for the setting.

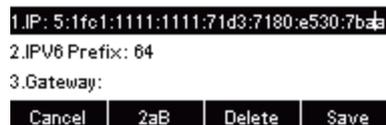

### To configure DHCP via phone interface:

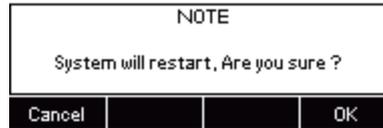

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WAN Port IPv6→DHCP mode.
2. Click Save and restart the phone.

### To configure a static IP address via phone interface:

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IPv6 →Static mode.
2. Enter the parameters: IP, IPV6 Prefix, Gateway, Pri. DNS(primary dns), sec. DNS(second DNS) in the corresponding fields.

3. Click Save and restart the phone.

#### To configure Network via web interface:

1. Click Network→Basic→IPv6 setting
2. Select the desired Type: DHCP, Static
3. Fill required fields.
4. Click the SaveSet and restart the phone.

**● IPv6 Setting**

DHCP ?  
 Static IP Address ?

IP Address

IPv6 Prefix (0~128)

Default Gateway

IPv6 Static DNS  No  Yes

Primary DNS

Secondary DNS

## IPv4&IPv6

If you set IP Mode to IPv4&IPv6, IP phone will support both IPv4 and IPv6 address. The settings of DHCP, Static, and PPPoE are same as above.

#### To configure IPv4&IPv6 via phone interface:

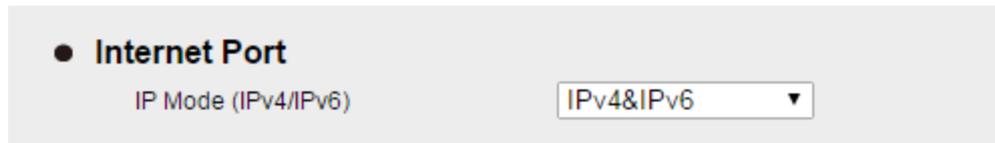

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IP Port Mode.
2. Press  or  to change the IP Port Mode..

3. Press  or Save soft key to save the configuration.

#### To configure IPv4&IPv6 via Web interface:

1. Click Network→Basic→ Internet Port
2. Select IPv4&IPv6 for Internet Port
3. Click  for the setting.

#### Note:

Wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information about these parameters, contact your system administrator.

## PC Port

Two modes for PC port: bridge and router.

#### To configure PC Bridge via Phone interface:

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→PC Port →Bridge mode.
2. Click Save and restart the phone.

#### To configure PC router via Phone interface:

1. Press Menu→Setting→Advanced Settings (password: admin) →Network→PC Port →Router mode.

2. Enter the IP, Netmask and DHCP server
3. Click Save and restart the phone.

**To configure Bridge via web interface:**

1. Click Network→Basic
2. Select  As Bridge
3. Click  and restart the phone

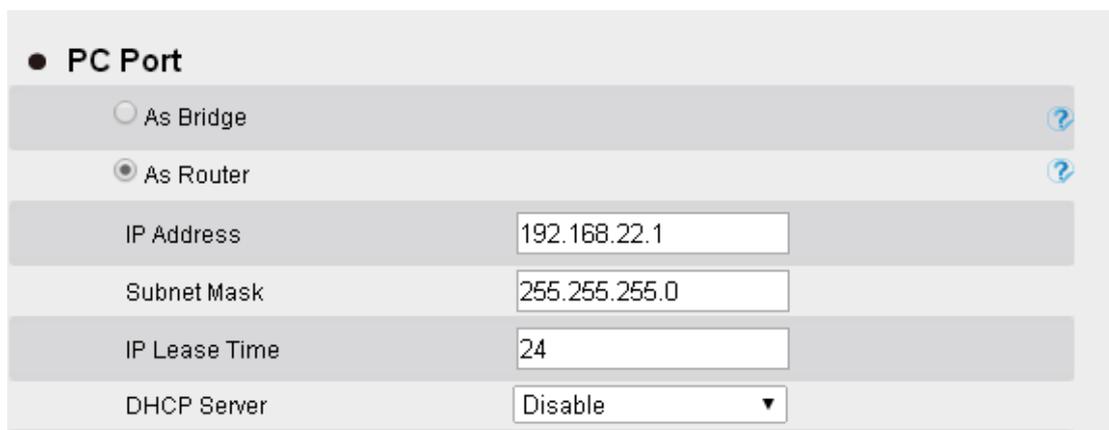

● PC Port

As Bridge [?](#)

**To configure Router via web interface:**

1. Click Network→Basic
2. Select As Router
3. Fill the IP address and other necessary information.
4. Click  and restart the phone

● PC Port

As Bridge [?](#)

As Router [?](#)

## Contact Settings

This section provides the operating instructions for managing contacts. The topics include:

- Local Directory
- Remote Phonebook
- LDAP
- Search Contact

### Local Directory

In the directory, you can add or delete your friends, business partner or anyone others' phone No. so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

#### A. To add contacts list into local directory

##### To add contacts manually

1. Press Menu → DIR→ Local Contacts
2. Press Add soft key

1.Name: |  
 2.Number:  
 3.Mobile Number:  
 Cancel 2aB Delete Save

3. Enter the necessary information as Name, Phone number ...
4. Press save soft key or  to add the contacts successfully.

##### To add contacts from History

1. Press History soft key or press Menu →History
2. Press  and  to select the targeted one. (Press  and  switched among the All calls, Dialed calls, Received calls, Missed Calls and Forward Calls).
3. Press Option soft key → Add to Contacts

4. Edit the necessary information as Name, Phone number ...
5. Press save soft key or  to add the contacts successfully.

**To add contacts via web interface**

1. Click Directory→Directory
2. Enter the name, number and some other information.
3. Press **Add** and then press **Save** button.

**B: To add contacts into blacklist**

**To add blacklist manually**

1. Press Menu → DIR

2. Press  and  or press Switch soft key to Choose the Local Contact.
3. Press More soft key.
4. Press More soft key.
5. Press Option soft key. Add to blacklist.
6. Press save soft key or  to add the contacts successfully.

#### **To add blacklist from history**

1. Press History soft key or press Menu → History → Local history
2. Press  and  to select the targeted one.
3. Press Option soft key → Add to Blacklist
4. Edit the necessary information as Name, Phone number...
5. Press save soft key or  to add successfully.

#### **To import or export the contact list**

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via web interface.

#### **To import an XML file of contact list via web interface:**

1. Click on Directory
2. Click Browse to select a contact list file (file format must be .xml) from your local system.
3. Click Import XML to import the contact list.

#### **To export an XML file of contact list via web interface:**

1. Click on Directory
2. Click Export XML to export the contact list.

#### **To import a CSV file of contact list via web interface:**

1. Click on Directory
2. Click Browse to select a contact list file (file format must be .csv) from your local system.
3. Click Import Csv to import the contact list.

**To export a CSV file of contact list via web user interface:**

1. Click on Directory
2. Click Export Csv to export the contact list.

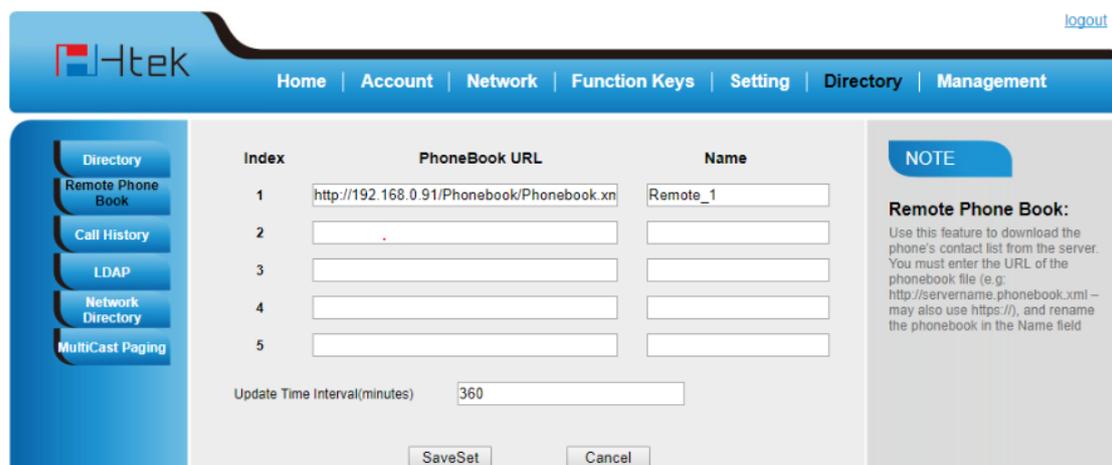

**Note:**

If the xml file and CSV file more than 1000 contacts, the phone will only upload 1000 contacts.

## Remote Phonebook

**To set Remote Phonebook via web interface:**

1. Login the webpage and click Directory→Remote Phone Book
2. Fill the path of the remote file in the Phone Book URL field.  
For example,  
<http://192.168.0.91/Phonebook/Phonebook.xml>
3. Fill the Name and then click  to save the configuration.

**To check the contacts via phone interface:**

Press Directory→Left Button→Left Button, and then you can see the item you set, press enter you will find the detail.

For More detail, please refer to: [Remote Phonebook](#) on [www.htek.com](http://www.htek.com) .

**Note:**

Every remote contact only support 1000 contacts.

## LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

**To configure LDAP via web interface:**

1. Login webpage and click Directory→LDAP
2. Filled the LDAP Name Filter:
  - a) This parameter specifies the name attributes for LDAP searching. The “%” symbol in the filter stands for the entering string used as the prefix of the filter condition.
  - b) For example (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.
3. Filled LDAP Number Filter:

This parameter specifies the number attributes for LDAP searching.
4. Filled Server Address: Fill the domain name or IP address of the LDAP Server.

For example: 192.168.0.9
5. Port(the port of the LDAP Serve) Base, User Name, Password
6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.
7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.
8. Filled the relative value and then click save button the save the settings.

Following is the example screenshot for the configuration.

**NOTE**

**To Configure LDAP Key via phone interface:**

1. Press Menu→Feature→Function Keys→Line Keys as Function Keys→Line Key 1
2. Select LDAP in the Type field
3. Press save or OK key to save the configuration.

When press the LDAP Key the LCD will display as following:

For More detail, please refer to [LDAP Notes](#) on [www.htek.com](http://www.htek.com)

## Search Contact

You can search contact in all contacts, local contacts, remote contacts and LDAP contact.

**To search contact in all contacts:**

1. Click the Directory softkey on Idle interface.
2. Click the More Softkey, then you can see the Search softkey
3. Click the Search softkey, you can enter the desired part of name or part of number.
4. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

**Note:**

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

**To search contact in Local contacts:**

1. Click the Directory softkey on Idle interface.
2. Click the  button and select the Local contacts list.
3. Click the More Softkey, then you can see the Search softkey
4. Click the Search softkey, you can enter the desired part of name or part of number.
5. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

**Note:**

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

**To search contact in Remote contacts:**

1. Click the Directory softkey on Idle interface.
2. Click the  button and select the remote contacts list.
3. Select the desired the remote contact and click Enter softkey.
4. Click the Search softkey, you can enter the desired part of name or part of number.
5. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

**Note:**

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

**To search contact in LDAP contacts:**

1. Click the LDAP function key.
2. Enter the first character or more of contact's name.
3. Select the desired the remote contact and click Enter softkey.

To press  and  during a call in handset mode.

### To adjust the headset volume

To press  and  during a call in headset mode.

### To adjust the speaker Volume

To press  and  during a call in speaker mode.

## Voice Mail Tone

This option can set whether to play the beep for phone's voice mail

- Click the Setting → Preference
- Select On or Off for Voice Mail Tone.
- Click  for the setting.

## Play Hold Tone

When you hold the phone, Whether to play hold tone

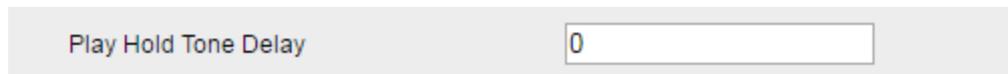

1. Click the Setting → Preference
2. Set On or Off for Play Hold Tone.
3. Click  for the setting.

## Play Hold Tone Delay

When you hold the phone. How many seconds to play beep?

1. Click the Setting → Preference
2. Set Enable or Disable for Play Hold Tone Delay.
3. Click  for the setting.

## System Settings

### Dial Plan

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

1,2,3,4,5,6,7,8,9,0,\*,#

Grammar	Description
x	any digit from 0-9;
xx+	at least 2 digit number;
^	exclude;

,	hear dial tone;
[3-5]	any digit of 3, 4, or 5;
[147]	any digit 1, 4, or 7;
<2=011>	replace digit 2 with 011 when dialing.

### To configure dial plan via web interface:

1. Click Account—Advanced—Dial Plan.
2. Filled the value in dial plan field.
3. Click **SaveSet** to save the configuration.

The screenshot shows the Htek web interface for configuring an account. The 'Account' section is selected, and the 'Advanced' tab is active. The 'Dial Plan' field is highlighted with a red box and contains the value `[[x*]+]`. Other fields include DTMF Payload Type (101), DTMF Type (RFC2833), and various encryption and jitter settings. A 'NOTE' section on the right provides information about basic and advanced parameters.

### Note:

Illegal input will fall back to default: `[[x*]+]`. For More, please refer to [dial plan](#) on [www.htek.com](http://www.htek.com)

## Dial-Now Timeout

Dial-Now Timeout means that when you enter the number which matches with dial plan, it will dial out automatically after some time when you stop entering the number.

### To configure Dial-Now Timeout via web interface:

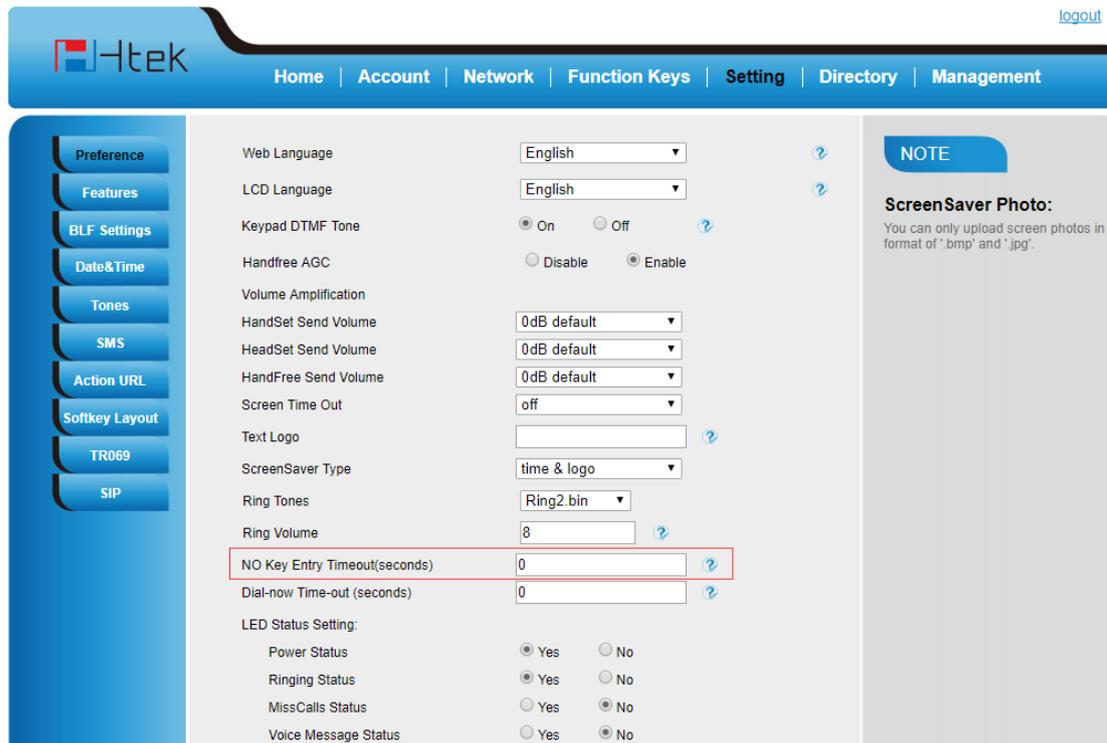

1. Click Webpage Setting → Preference
2. Fill the blank of Dial-Now Timeout: for example 5(seconds).(0 means dial out immediately).
3. Click the  button to save the configuration

## No Key Entry Timeout

No Key Entry Timeout means that when you enter the number, it will dial out automatically after some time when you stop entering the number.

### To configure No Key Entry Timeout

1. Click Webpage Setting → Preference
2. Fill the blank of No Key Entry Timeout: for example 5(seconds).(0 means never timeout, you should press the send key to dial out the number).
3. Click the  button to save the configuration.

## Emergency Call

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

### To configure emergency call via web interface:

1. Click Setting→Features→Phone Lock
2. Enter the emergency services number in the Emergency field
3. Click **SaveSet** to save the configuration.

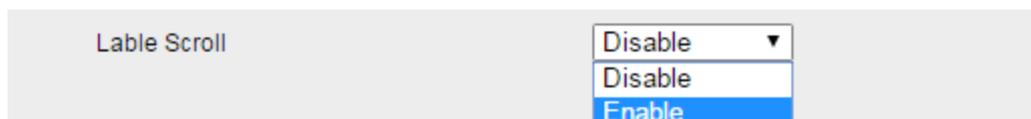

## Label Scroll

When setting function keys, you need to set the label of the function keys. If the words are too long to show on the label, you can use this function to make labels scroll. Another approach is to set the labels to long label mode.

**To configure Label Scroll via web interface:**

1. Click the Setting → Preference
2. Select Enable or Disable for Label Scroll.

3. Click  for the setting.

## Show Missed Calls

2. Select Yes or No for Show Missed Calls.

3. Click  for the setting.

## Auto Logout Time

Set the Web login timeout

1. Click the Setting → Preference
2. Set number 1~5000 min for Auto Logout Time.

3. Click  for the setting.

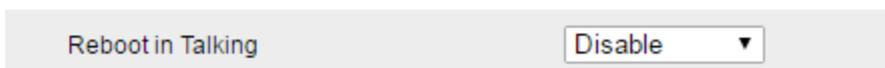

## Reboot in Talking

This function is to allow reboot during the calls or not

1. Click the Setting → Preference
2. Set Enable or Disable for Reboot in Talking.

3. Click  for the setting.

## Detect IP Conflict

LCD can display message when IP conflict

1. Click the Setting → Preference
2. Set Enable or Disable for Detect IP Conflict.

3. Click  for the setting.

## Redial Mode

Call redial has two ways:(1) To redial the last placed call from the IP Phone (2) To redial the call from all calls list

1. Click the Setting → Preference
2. Set Direct Mode or Select Mode for Redial Mode.

3. Click  for the setting.

## Keypad Lock

### To enable Keypad Lock via Phone

1. Press Menu--Settings--Advanced Setting--Phone Setting--Lock
2. Press Info or Switch to change choose lock type: All Keys Menu Key Function Key Lock & Answer
3. Press Save or OK key to save the configuration.

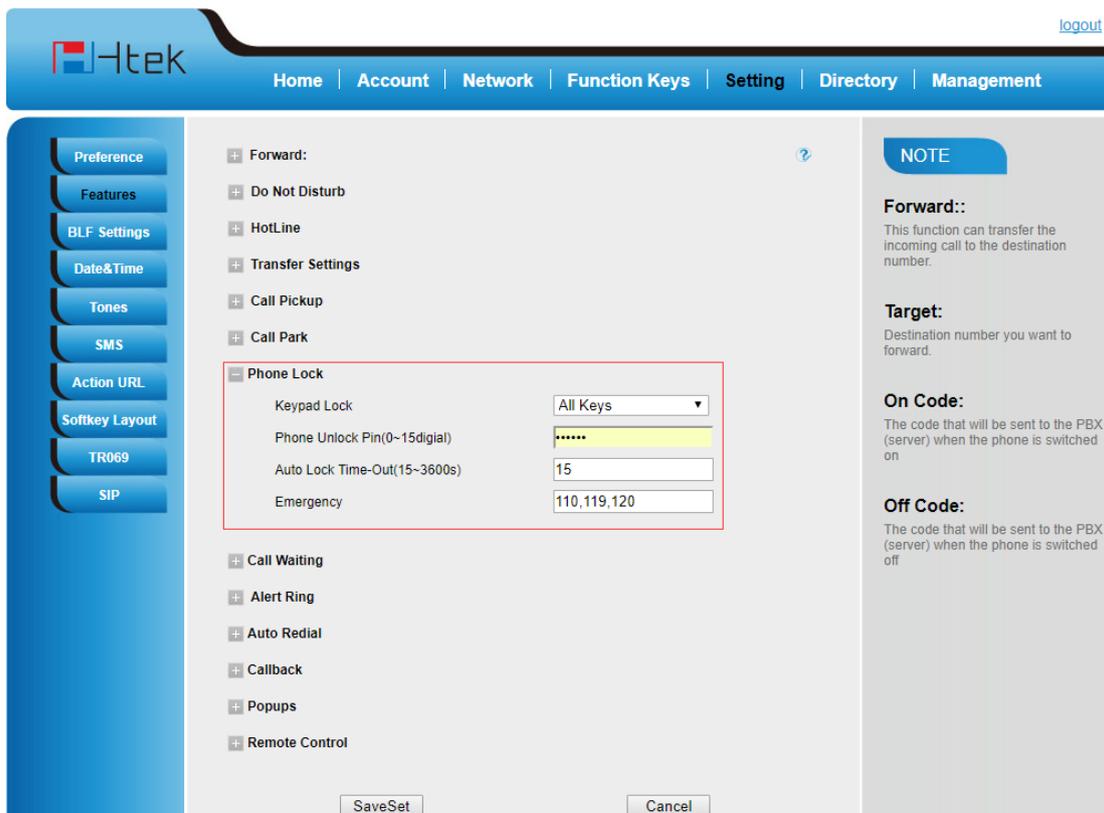

### To disable Keypad Lock via Phone

1. Press Menu--Settings--Advanced Setting--Phone Setting--Lock
2. Press Info or Switch to change to choose Off.
2. Press Save or OK key to save the configuration.

### To enable Keypad Lock via Webpage

1. Click Webpage Setting → Features

2. To choose the Phone Lock.
3. To fill the unlock PIN and auto lock time
4. Fill the Emergence Number, when the phone is Lock, only Emergency Number can be sent.
5. To click  to save the configuration.

### To Disable Keypad Lock via Webpage

1. Click Webpage Setting → Features
2. To choose Disable for the Phone Lock.
3. To click  to save the configuration.

## Suppress DTMF Display

In order to ensure safety in Call process, you can choose whether to hide DTMF

1. Click the Setting → Preference
2. Select On or Off for Suppress DTMF Display.

3. Click  for the setting.

**Note:**

1. If C does not answer the call, A can back to continue the conversation with B;
2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B conversation continues.
3. The conference feature is not available on all servers. For more information, contact your system administrator.
4. To realize the 5 way conference, the line should be all available.

## Call Forward

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward

### To configure static forward

#### To configure always forward

With this feature, all incoming calls will forward immediately to configured number.

1. Press Menu → Features → Call forward →Always Forward.
2. Press  and  or press info soft key to select the enable choice

3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

#### To configure busy forward

With this feature, the incoming calls are immediately forwarded if the phone is busy.

1. Press Menu →Features → Call forward →Busy forward.

2. Press  and  or press info soft key to select the enable choice.
3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

### To configure no answer forward

No Answer Forward: Incoming calls are forwarded if not answered after some time.

1. Press Menu → Features → Call forward → No answer forward.
2. Press  and  or press info soft key to select the enable choice
3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

When the Forward feature is enabled, the Forward Icon will display on Top of the LCD.

### To configure Forward via Web Interface

1. Setting → Features
2. Click On for the Always/Busy/No Answer
3. Fill the Forward to Number
4. (Optional) fill the on/off code
5. Click  to save the configuration

### To cancel the forward feature via Phone Interface

1. Press Menu → Features → Call forward → Always/Busy/No answer Forward
2. Press and or press info soft key to select the disable choice
3. Press or Save soft key to save the configuration.

### To cancel the forward feature via Web Interface

1. Setting → Features
2. Click Off for the Always/Busy/No Answer
3. Click to save the configuration

### To configure dynamic forward

#### Forward an incoming call during the ringing.

1. When the phone is ringing, press Forward soft key.

2. Enter the forward number or select the desired number from Directory softkey

(Precondition: local directory has a or more contacts).

3. Press  or press the send soft key, then the call is forwarded.

**Note:**

**If the Programmable Key or line key is set as BLF, when an incoming call ringing, press this BLF key directly to realize the dynamic forward.**

**You can choose a desired forward number from the Directory when you press the Forward key.**

## Call Return

This feature allows you to dial the last phone call you received.

### To configure the Call Return via phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  or press info soft key to select the Key Event in the type field.
4. Press  and  or press info soft key to select the Call Return.
5. Press  or Save soft key to save the configuration

### To configure the Call Return via Web interface

1. Click Function keys → Line Key.
2. Select the desired Line Key and select Call Return in the Type.
3. Click the  button to save the configuration.

## Call Back

When this option is set, if the phone you call is busy and does not set call waiting or voice

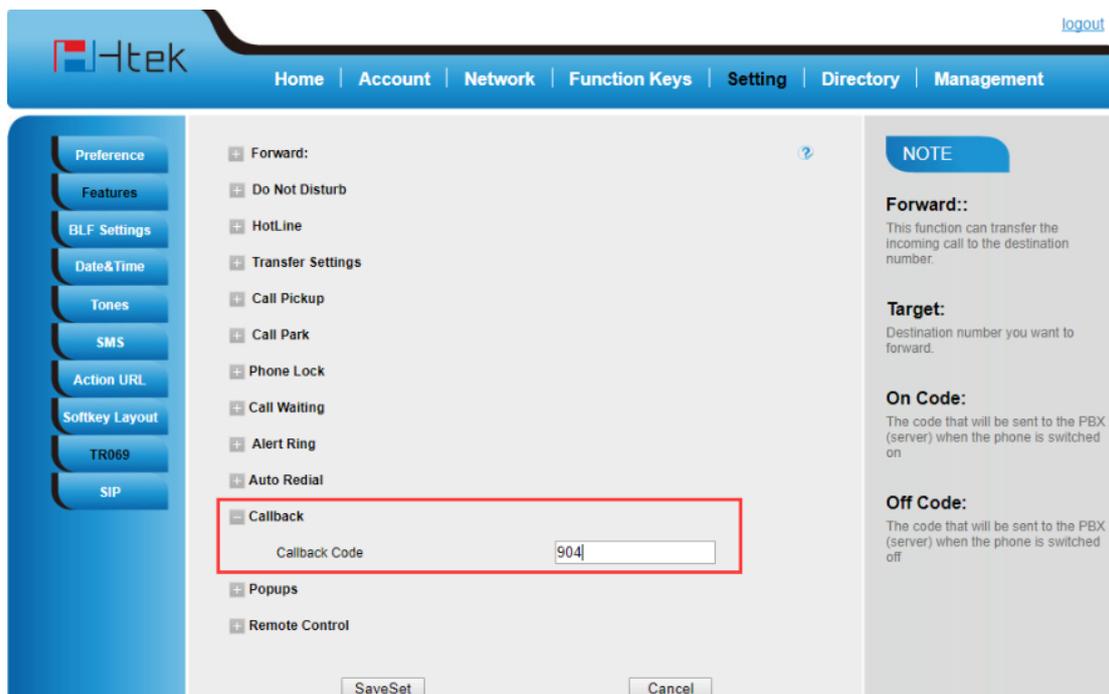

mail, your LCD screen will prompt for call-back, as shown in figure

If you press the callback, the phone will dial the Callback phone number.

### To configure the Call Back via Web interface

1. Click Setting → Features → Callback .
2. Fill the Callback phone number.
3. Click  to save the configuration.

## Call Waiting Tone

1. Click Setting → Features
2. Select Call Waiting: On and Call Waiting Tone: On

The screenshot shows the Htek web interface with the 'Setting' menu open. The 'Call Waiting' section is highlighted with a red box. It contains two options: 'Call Waiting' and 'Call Waiting Tone', both of which are currently set to 'On' via radio buttons. Other settings like 'Forward', 'Do Not Disturb', and 'Alert Ring' are visible but not highlighted. A 'NOTE' section on the right explains the 'Forward' and 'On Code' functions.

### To Change the Call Waiting Tone time via Web interface

1. Click Setting → Tones

The screenshot shows the 'Tones' settings page in the Htek web interface. The 'Call Waiting Tone' field is highlighted with a red box and contains the value 'f1=440@-13,c=300/10000-300/10000-0/0;'. Below the field, a syntax note reads: 'Syntax: f1=freq@vol, f2=freq@vol, c=on1/off1-on2/off2-on3/off3; [...]'. A 'NOTE' section on the right explains the 'Select Country' dropdown menu.

2. Change the Tone Time as you want (for example 3s)

This is a close-up of the 'Call Waiting Tone' field. The value 'c=300/3000-300/3000-0/0;' is highlighted with a red box, showing the modification of the tone duration from 10000 to 3000 milliseconds.

## Hide Caller ID

Just enable the anonymous call feature, you can set your ID do not appear on the other phone that you called.

### To configure anonymous call

1. Press Menu →Features →Anonymous Call
2. Press  and  or press info soft key to change the Line ID
3. Press  and  or press info soft key to select the enable choice in Anonymous Call filed.
4. Enter the call on code (optional), call off code (optional).
5. Press  or Save soft key to save the configuration.

### To cancel anonymous call feature

1. Press Menu →Features →Anonymous Call
2. Press  and  or press info soft key to select the disable choice in Anonymous Call filed.
3. Press  or Save soft key to save the configuration.

## Reject Anonymous

If you do not want to be disturb by anonymous calls, you can set the reject anonymous call features, so you will not hear the unknown calls

### To configure rejecting anonymous call

1. Press Menu →Features →Anonymous Call

2. Press and or press info soft key to change the Line ID
3. Press and or press info soft key to select the enable choice in Rejection filed.
4. Press or Save soft key to save the configuration

#### To cancel rejecting anonymous call

1. Press Menu →Features →Anonymous Call
2. Press and or press info soft key to select the disable choice in Rejection filed.
3. Press or Save soft key to save the configuration.

## Call Mute

When you use the Mute feature, the other parties will not hear your voice while you can hear their voice. Call mute applies to all modes (handset, headset, and speakerphone).

#### To mute the call during a call (including a conference call)

1. Press the mute key , then the mute key glows green, and the LCD display Mute Icon.

2. To disable the mute function, press again.

## DND

When you use the DND feature, the phone is to reject all incoming calls automatically and you can see the DND icon shown on the Top of the LCD on idle page.

### To enable DND feature

Press the DND soft key when the phone is idle, and then DND icon shown on the LCD.

### To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

## Keypad Lock

### To enable Keypad Lock via Phone

1. Press Menu--Settings--Advanced Setting--Phone Setting--Lock
2. Press Info or Switch to change choose lock type: All Keys Menu Key Function Key Lock & Answer
3. Press Save or OK key to save the configuration.

### To enable Keypad Lock via Phone

1. Press Menu--Settings--Advanced Setting(Password: admin)--Phone Setting--Lock
2. Press Info or Switch to change choose Off.
3. Press Save or OK key to save the configuration.

### To enable Keypad Lock via Webpage

1. Click Webpage Setting → Preference
2. To choose the Lock keys.
3. To fill the unlock PIN and auto lock time
4. Fill the Emergence Number, when the phone is Lock, only Emergency Number can be sent.

- To click Saveset to save the configuration.

The screenshot shows the Htek web interface with the 'Setting' menu selected. The 'Phone Lock' section is expanded and highlighted with a red box. The configuration details are as follows:

Field	Value
Keypad Lock	All Keys
Phone Unlock Pin(0~15digital)	*****
Auto Lock Time-Out(15~3600s)	15
Emergency	110,119,120

Other visible settings include Forward, Do Not Disturb, HotLine, Transfer Settings, Call Pickup, Call Park, Call Waiting, Alert Ring, Auto Redial, Callback, Popups, and Remote Control. A 'SaveSet' button is located at the bottom of the configuration area.

### To Disable Keypad Lock via Webpage

- Click Webpage Setting → Preference
- To choose Disable for the Phone Lock.
- To click Saveset to save the configuration.

## Hot Line

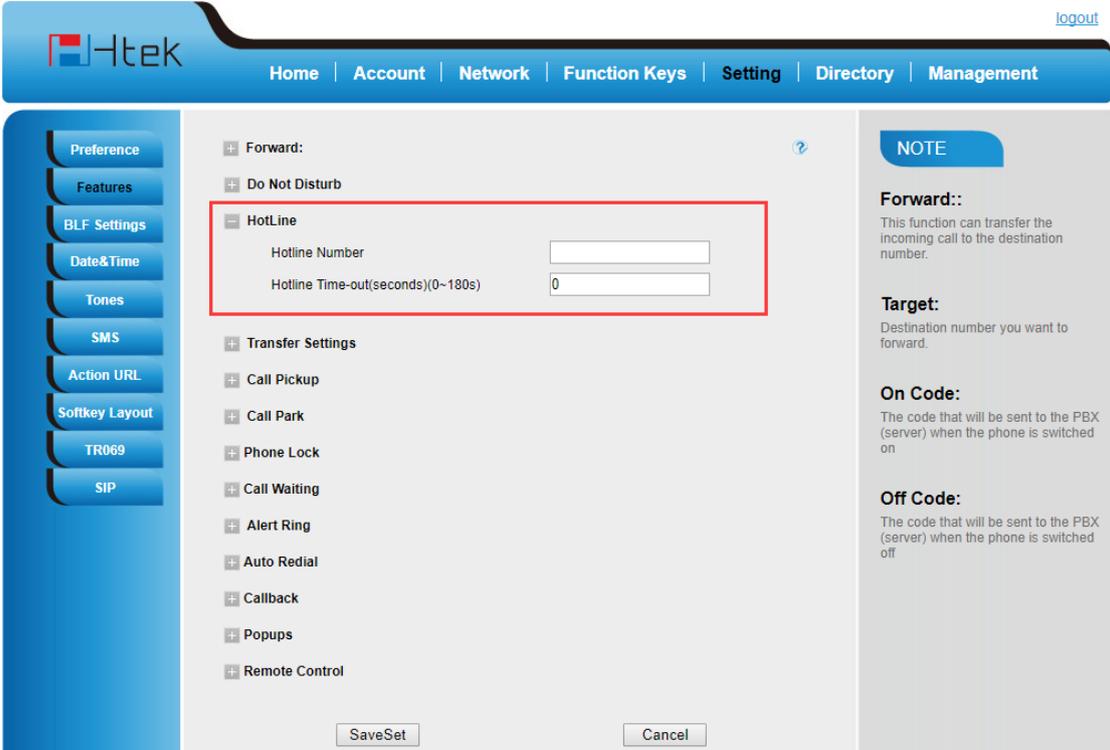

### To configure Hot Line

- Press Menu → Features → Hot Line
- Enter the Number and delay time (as present, we support off hook auto dial).

- Press  or Save soft key to save the configuration

### To configure Hotline auto dial via Web Interface

- Setting → Features.
- Fill the number in the Hotline Number and Hotline Time-out.
- Click  to save the configuration.

The screenshot shows the Htek web interface for configuring features. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. A sidebar on the left lists various settings categories like Preference, Features, BLF Settings, Date&Time, Tones, SMS, Action URL, Softkey Layout, TR069, and SIP. The main content area displays a list of features with expandable sections. The 'HotLine' section is expanded and highlighted with a red box, showing two input fields: 'Hotline Number' and 'Hotline Time-out(seconds)(0-180s)'. The 'SaveSet' button is located at the bottom of the configuration area. A 'NOTE' section on the right provides details about the Forward function, including its purpose, target, on code, and off code.

Delete the hotline number and save the configuration, and then now the Hotline auto dial is cancelled.

## Auto Redial

When this option is set, if the phone you call is busy and does not set call waiting or voice mail, your LCD screen will prompt for Auto Redial, as shown in figure.

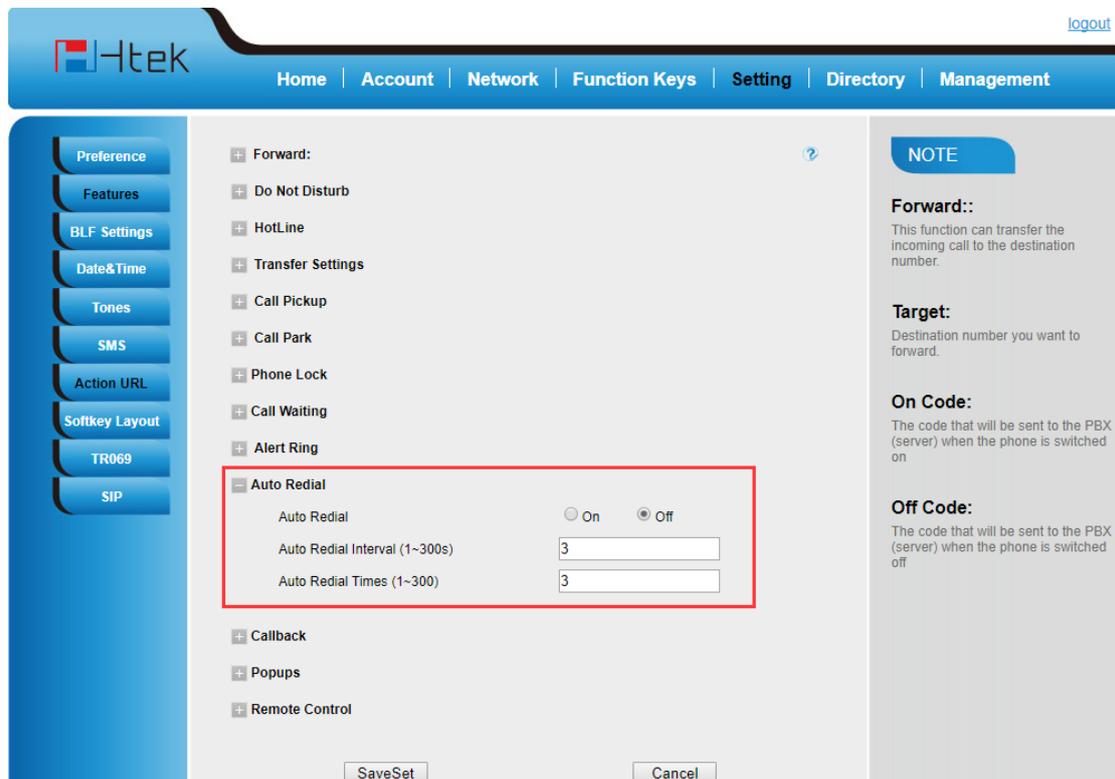

If you press OK, your LCD will prompt Auto Redial Interval and Auto Redial Times

### To configure Auto Redial via Web Interface

1. Click Setting → Features → Auto Redial
2. Select On or Off for Auto Redial.
3. Fill the number 1~300 seconds for the Auto Redial Interval.
4. Fill the number 1~300 times for the Auto Redial Times.
5. Click **SaveSet** to save the configuration.

# Function Key Features Settings

## Line

It works same as Line keys.

### To configure Line Feature via Web Interface

1. Click Function keys → Line Key.
2. Select the wanted Key and set as Line.
3. Select the Account.
4. Click the  button to save the configuration.

The screenshot shows the Htek web interface for configuring Line keys. The navigation menu includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The 'Function Keys' section is active, showing a table of keys. Key1 is highlighted with a red border and set to 'Line' type and 'Account 1'. Other keys are set to 'N/A' or 'Auto'. There are 'SaveSet' and 'Restart' buttons at the bottom.

Line	Type	Value	Label	Account	Extension
Key1	Line			Account 1	
Key2	Line			Auto	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

## Speed Dial

With this feature, you can dial one directory by press the definite key.

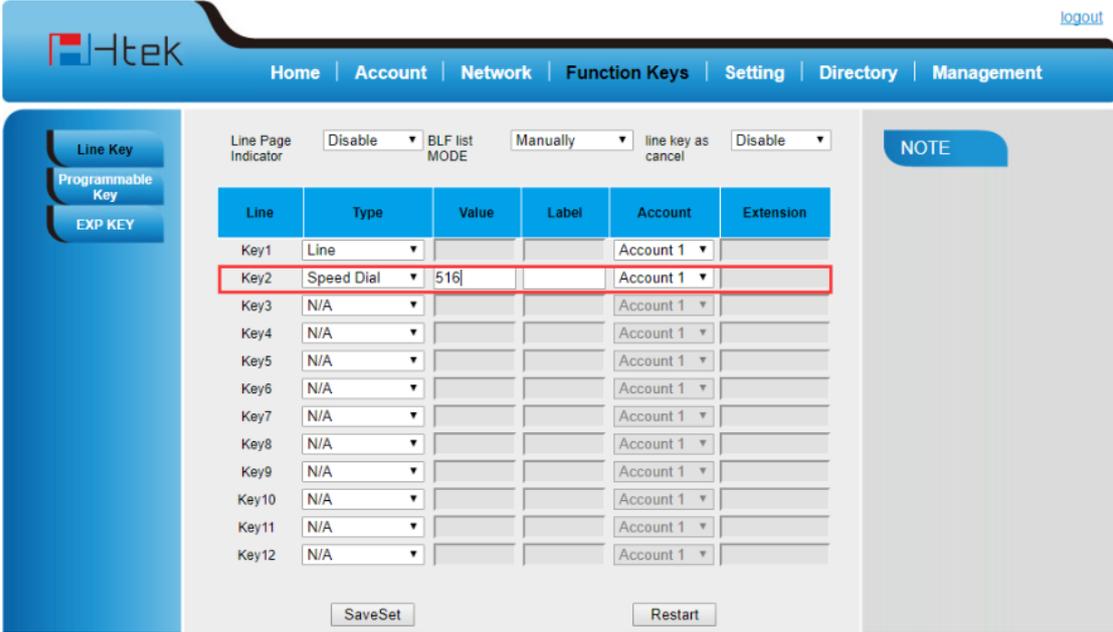

### To configure Speed Dial feature via phone interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Press  and  key to select the Speed Dial in the type field.
3. Enter the targeted Number.
4. Press  or Save soft key to save the configuration

Then the selected Line Key will work as Speed Dial.

### To configure Speed Dial feature via Web Interface

1. Click Function keys →Line Key.
2. Select the wanted Line Key and set as Speed Dial.
3. Enter the desired phone number in the Value field.
4. Select the Account ID

5. Press  or Save soft key to save the configuration

### To configure the Prefix via Web interface

1. Click Function key → Line Key.
2. Select the desired Line Key and select Prefix in the Type.
3. Fill the value.
4. Click the  button to save the configuration.

Then when you press this key, the set value is input directly.

## Local Group

When use the Local Group feature, press the key and enter the local Contacts interface quickly.

### To configure the Local group via Phone Interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Local group in the type field.
4. Press  or Save soft key to save the configuration

### To configure the Local Group via Web interface

1. Click Function key → Line Key.
2. Select the desired Key and select Local group in the Type.

- Click the button to save the configuration.

Then you can press the local group key to access the pre-defined contact group in the local directory quickly.

The screenshot shows the Htek web interface for configuring function keys. The main content area contains a table with the following columns: Line, Type, Value, Label, Account, and Extension. The 'Key2' row is highlighted with a red border, indicating it is the selected key. The 'Type' field for Key2 is set to 'Local Group' and the 'Account' field is set to 'Account 1'. Other keys (Key1, Key3-12) are currently set to 'N/A' or 'Line'. The interface also includes a 'SaveSet' button at the bottom and a 'Restart' button. A 'NOTE' section is visible on the right side of the page.

Line	Type	Value	Label	Account	Extension
Key1	Line			Auto	
Key2	Local Group			Account 1	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

## XML Group

When use the XML Group feature, press the key and enter the Remote Contacts interface quickly.

### To configure the XML group via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
- Select the wanted Line Key.
- Press and key to select the XML group in the type field.
- Press or Save soft key to save the configuration

### To configure the XML Group via Web interface

1. Click Function key → Line Key.
2. Select the desired Key and select XML group in the Type.
3. Click the button to save the configuration.

The screenshot shows the Htek web interface for configuring function keys. The navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The 'Function Keys' section is active, showing a table of keys. Key2 is selected, with its Type set to 'XML Group' and Account set to 'Account 1'. The 'SaveSet' button is located at the bottom of the table.

Line	Type	Value	Label	Account	Extension
Key1	Line			Auto	
Key2	XML Group			Account 1	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

## LDAP

When use the LDAP feature, you can get the LDAP Phonebook directly.

### To configure the LDAP via Phone Interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press and key to select the LDAP in the type field.
4. Press or Save soft key to save the configuration

### To configure the LDAP via Web interface

1. Click Function key → Line Key.
2. Select the desired Key and select LDAP in the Type.
3. Click the  button to save the configuration.

The screenshot shows the Htek web interface for configuring function keys. The navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The 'Function Keys' section is active, showing a table of keys. Key2 is selected and its 'Type' is set to 'LDAP'. The 'SaveSet' button is highlighted.

Line	Type	Value	Label	Account	Extension
Key1	Line			Auto	
Key2	LDAP			Account 1	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

## Broadsoft Group

When use the BroadSoft Group feature, press the key and enter the Remote Contacts interface quickly.

### To configure the Broadsoft group via Phone Interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Broadsoft group in the type field.

4. Press  or Save soft key to save the configuration

#### To configure the Broadsoft group via Web interface

1. Click Function key → Line Key.
2. Select the desired Key and select Broadsoft group in the Type.
3. Click the  button to save the configuration.

## Conference

#### To configure the Conference via Phone Interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Conference in the type field.
4. Press  or Save soft key to save the configuration

#### To configure Conference via Web Interface

1. Click Function keys → Line Key.
2. Select the desired Key and select Conference in the Type.
3. Click the  button to save the configuration.

## Forward

If the key is configured as Forward key, press this key under the idle status, the IP phone will turn to the Always Forward interface and you can set the Forward to number, then when there is any call to the number will be forwarded to the set number automatically.

### To configure the Forward via Phone Interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Forward in the type field.
4. Enter the Number that to forward.
5. Press  or Save soft key to save the configuration

### To configure Forward via Web Interface

1. Click Function keys → Line Key.
2. Select the desired Key and select Forward in the Type.
3. Enter the Value with the number you want to forward
4. Click the  button to save the configuration.

## Transfer

You are able to configure the key as a transfer key to perform the Blind/Attended Transfer.

### To configure the Transfer via Phone Interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Transfer in the type field.
4. Enter the Number that transfer to
5. Press  or Save soft key to save the configuration

### To configure Transfer via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select Transfer in the Type.
3. Enter the Value with the number that wanted transfer to
4. Click the  button to save the configuration.

## Hold

The key can be configured as a hold key. You can use this key to hold and resume a call during the conversation.

### To configure the Hold via Phone Interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Hold in the type field.

4. Press  or Save soft key to save the configuration

#### To configure Hold via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select Hold in the Type.
3. Click the  button to save the configuration.

## Group Listening

With this feature, when you active a call, you can listen using Handset and Free-speaker, but only can use the handset to speak.

#### To configure the Group listening via Phone Interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the group listening in the type field.
4. Press  or Save soft key to save the configuration

#### To configure Group listening via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select Group listening in the Type.
3. Click the  button to save the configuration.

## DND

When you use the DND feature, the phone is to reject all incoming calls automatically and you can see the DND icon shown on the Top of the LCD on idle page.

### To configure the DND via Phone Interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the DND in the type field.
4. Press  or Save soft key to save the configuration

### To configure DND via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select DND in the Type.
3. Click the  button to save the configuration.

### To enable DND feature

Press the DND soft key when the phone is idle status, and then DND icon shown on the LCD.

### To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

## Redial

If the key is configured as Redial key, you can redial the last placed call from the IP Phone.

### To configure Redial via Web Interface

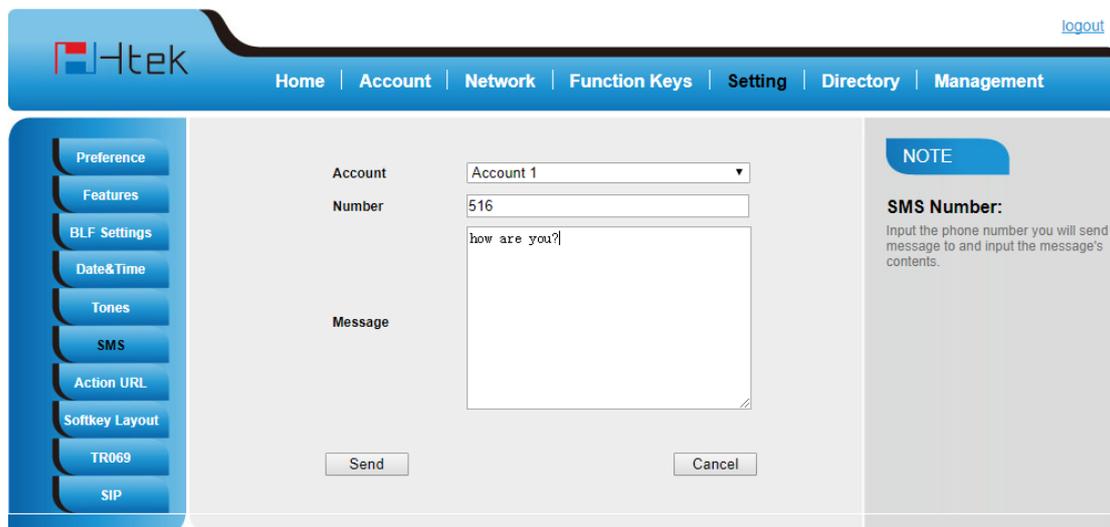

1. Click Function keys →Line Key
2. Select the desired Key and select redial in the Type.
3. Enter the Label displayed on LCD.
4. Click the  button to save the configuration.

## SMS

### Send SMS

#### To send SMS via web Interface

1. Click Setting→SMS
2. Select the account(from which account the SMS sent)
3. Enter the target number
4. Input the content of SMS, and click Send.

The screenshot shows the Htek web interface for sending SMS. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. A sidebar on the left lists various settings: Preference, Features, BLF Settings, Date&Time, Tones, SMS, Action URL, Softkey Layout, TR069, and SIP. The main content area contains a form with the following fields:

- Account: A dropdown menu showing "Account 1".
- Number: A text input field containing "516".
- Message: A text area containing "how are you?".

At the bottom of the form are "Send" and "Cancel" buttons. On the right side, there is a "NOTE" box with the text: "SMS Number: Input the phone number you will send message to and input the message's contents."

#### To send SMS via phone interface:

1. Click Menu→Message→Text Message→Set SMS
2. Enter the contents in the white field.

3. Press the save button
4. Select the account (from which account the SMS sent)
5. Enter the target number (to which account the number sent)
6. Press the Send button.

## Set SMS Line Key

### To configure the SMS via Phone Interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the SMS in the type field.
4. Press  or Save soft key to save the configuration

### To configure SMS via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select SMS in the Type.
3. Click the  button to save the configuration.

## Record

With record feature, you can record calls by pressing a record key on the phone.

### To configure the record via phone interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)

2. Select the wanted Line Key.
3. Press  and  or press info soft key to select the Key Event in the type field.
4. Press  and  or press info soft key to select the Record.
5. Press  or Save soft key to save the configuration

#### To configure the record via Web Interface

1. Click Function keys → Line Key.
2. Select the desired Line Key and select Record in the Type.
3. Click the  button to save the configuration.

#### Note:

Please contact the system administrator whether support this feature or not.

## URL Record

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

#### To configure the URL record via phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the URL Record.
4. Press  or Save soft key to save the configuration

#### To configure the record via Web Interface

1. Click Function keys → Line Key.

2. Select the desired Line Key and select URL Record in the Type.
3. Click the  button to save the configuration.

## Paging

With this feature, you can call a paging group directly.

### To configure the paging via phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press  and  or press info soft key to select the Key Event in the type field.
4. Press  and  or press info soft key to select the Paging.
5. Press  or Save soft key to save the configuration

### To configure the Paging via Web interface

1. Click Function keys → Line Key.
2. Select the desired Line Key and select Paging in the Type.
3. Click the  button to save the configuration.

## Shared Line

This feature allows subscribers to share SIP lines. Moreover it also provides status monitoring of the shared line.

### To configure the line key as shared line via phone interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Shared Line in the type field.
4. Press  and  key to select the Account ID.
5. Enter the Label
6. Enter the Value
7. Press  or Save soft key to save the configuration

#### **To configure the line key as shared line via Web Interface**

1. Click Function keys → Line Key.
2. Select the desired Line Key and select Shared Line in the Type.
3. Enter the Value.
4. Enter the Label.
5. Select the Account ID
6. Click the  button to save the configuration and then restart.

#### **Note :**

**This feature is not available on all servers. For more information, contact your system administrator.**

## Public Hold

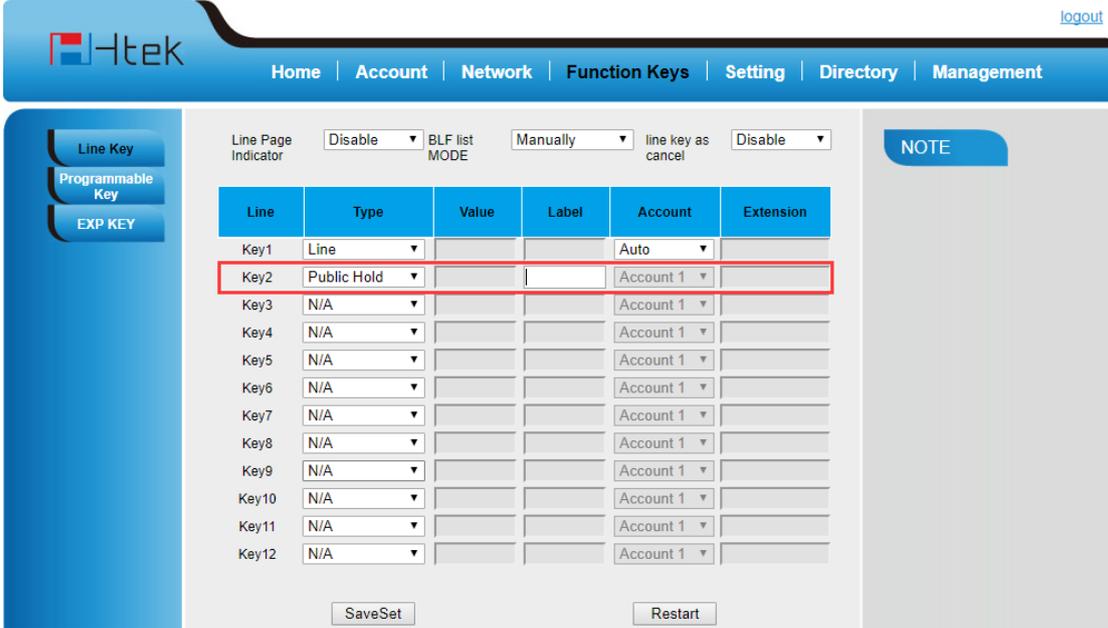

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

### To configure the Public hold via phone interface

1. Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1 (for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Public Hold.
4. Press  or Save soft key to save the configuration

### To configure public hold via Web Interface

1. Click Function keys → Line Key.
2. Select the desired Key and select public hold in the Type.
3. Click the  button to save the configuration.

The screenshot shows the Htek web interface for configuring function keys. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The main content area displays a table for configuring function keys. The table has columns for Line, Type, Value, Label, Account, and Extension. Key2 is highlighted with a red box, and its Type is set to 'Public Hold'. The 'SaveSet' button is visible at the bottom.

Line	Type	Value	Label	Account	Extension
Key1	Line			Auto	
Key2	Public Hold			Account 1	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

## Private Hold

The key can be configured as a private hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold the call, but only the initiator can resume the call.

### To configure the Private hold via phone interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  key to select the Private Hold.
4. Press  or Save soft key to save the configuration

### To configure private hold via Web Interface

1. Click Function keys →Line Key.
2. Select the desired Key and select public hold in the Type.
3. Click the  button to save the configuration.

Line Page Indicator:  BLF list MODE:  line key as cancel:

Line	Type	Value	Label	Account	Extension
Key1	Line			Auto	
Key2	Private Hold			Account 1	
Key3	N/A			Account 1	
Key4	N/A			Account 1	
Key5	N/A			Account 1	
Key6	N/A			Account 1	
Key7	N/A			Account 1	
Key8	N/A			Account 1	
Key9	N/A			Account 1	
Key10	N/A			Account 1	
Key11	N/A			Account 1	
Key12	N/A			Account 1	

SaveSet Restart

## Share line

Htek IP Phone supports shared call appearance by Broadsoft and XCast standard. This feature allows members of the SCA group to shared SIP lines and provides status monitoring (idle, active, progressing, hold) of the shared line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered.

All the users that belong to the same SCA group will be notified by visual indicator when a user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold. When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable shared call appearance, the user would need to register the shared line account on the phone. In addition, they would need to navigate to "Account" ->"Advanced" on the webpage and set the line to "Shared Line" and "SIP Server Type", and configure the line key or Line Key as "line" type with the desired account on webpage or LCD. If the user

requires more shared call appearances, the user can configure multiple line keys (Function keys->Line key) to be “line” type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on shared line can be placed on hold or barged in.

### To configure the line key as line via phone interface

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  or press  key to select the Line in the type field.
4. Press  and  or press  key to select the Account ID.
5. Enter the Label
6. Enter the Value
7. Press  or Save soft key to save the configuration

### To configure the line key as line via Web Interface

1. Click Function keys → Line Key.
2. Select the desired Line Key and select Line in the Type.
3. Enter the Value.
4. Enter the Label.
5. Select the Account ID

- Click the  button to save the configuration and then restart.

**Note :**

**This feature is not available on all servers. For more information, contact your system administrator.**

## Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long at all, which means actual personal offices would be often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, that is, many users can share the phone resource in different time. To use this feature, you need to configure a Hot Desking key in advance.

This feature is supported on the version 1.0.3.82 or later

### To configure the hot desking via phone interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
- Select the wanted Line Key.
- Press  and  or press  key to select the hot desking.
- Enter the display name in the value field.
- Press  or Save soft key to save the configuration

### To configure the hot desking via web interface:

- Click Function keys →Line Key.
- Select the desired Key and select hot desking in the Type.
- Enter the number in the value field.

4. Select the desired account from the pull-down list of Account field.
5. Click the  button to save the configuration.

**To use the Hot desking feature on the user interface:**

1. Press the Hot desking key when the IP Phone is idle.
2. Enter the Extension number and password

```
1.User Name:532
2.Password:*****
Cancel abc Delete Save
```

3. Click Save softkey

You can see the account information which has changed.

**Note :**

**This feature is not available on all servers. For more information, contact your system administrator.**

## ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, you should configure an ACD key in advance.

**To configure the ACD via phone interface**

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  or press  key to select the ACD.

4. Enter the label in the label field.
5. Select the desired account in the Account field.
6. Press  or Save soft key to save the configuration

**To configure the ACD via web interface:**

1. Click Function keys →Line Key.
2. Select the desired Key and select ACD in the Type.
3. Enter the label in the label field.
4. Select the desired account from the pull-down list of Account field.
5. Click the  button to save the configuration.

**Note :**

**This feature is not available on all servers. For more information, contact your system administrator.**

## Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later

**To configure the zero touch via phone interface**

1. Press Menu →Features →Function Keys→Line Keys as Function Keys →Line Key1(for example)
2. Select the wanted Line Key.
3. Press  and  or press  key to select the zero touch
4. Press  or Save soft key to save the configuration

**To configure the zero touch via web interface:**

1. Click Function keys →Line Key.
2. Select the desired Key and select zero touch in the Type.
3. Click the  button to save the configuration.

**To use the zero touch feature on the user interface:**

1. Press the zero touch key when the IP Phone is idle.
2. The IP Phone will enter the WAN Port interface, you can change the WAN Type by pressing the Navigation keys.
3. Press the Next softkey to enter Network interface, then you can configure some information.
4. Press the Next softkey again, you can configure auto provision information.
5. When you finish the setting, you can press the OK to accept the changes.

**Note :**

**This feature is not available on all servers. For more information, contact your system administrator.**

## Multicast Paging

You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address(es) without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address(es) without involving SIP signaling. You can specify up to 10 multicast listening addresses.

## Sending RTP Stream

**To configure a multicast paging key via phone interface**

1. Press Menu→Feature →Line Key→Line Key1 ( e.g. )
2. Press  and  or switch key to select the multicast paging in the type field.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
4. The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
5. Press  or Save soft key to save the configuration

### To configure a multicast paging key via web interface

1. Function keys->line key :
2. Select the desired Key and select multicast paging in the Type.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.  
The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
4. Click the  button to save the configuration.

### Sending RTP Stream :

Press the multicast paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP: Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP:Port). For both sending and receiving of the multicast RTP, there is no SIP signaling involved.

The multicast paging key LED illuminates solid green.

## Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address(es) without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

### Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored

automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:

- 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- Disabled: The voice call in progress will take precedence over all incoming paging calls.

### **Paging Priority Active**

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

### **Multicast Codec :**

You can only configure the codec by web interface.

#### **To configure multicast codec key via web interface**

1. Click Directory ->Multicast Paging :
2. Select the desired codec from the pull-down list of Multicast Codec
3. Click the  button to save the configuration.

#### **To configure multicast listening addresses via web interface :**

1. Click Directory->Multicast paging.
2. Select the desired value from the pull-down list of Paging Barge.
3. Select the desired value from the pull-down list of Paging Priority Active.
4. Enter the multicast IP address(es) and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
5. Enter the label in the Label field.
6. Click  button to save the configuration.

**Note:**

The priorities of listening addresses are predefined: 1 with the highest priority, 10 with the lowest. Both the multicast paging sender and receiver's phones play a warning tone when establishing a multicast paging call. Multicast listening addresses are configurable via web interface only.

## Upgrade

### Factory Reset

**To set Factory Reset by phone interface**

1. Press Menu → Setting → Advanced Setting( default password: admin) → Phone Setting → Factory Reset

2. Press OK soft key in the warning page.

**To Reset to Factory via web interface**

1. Click Management → Upgrade
2. Click  and then confirm the setting.

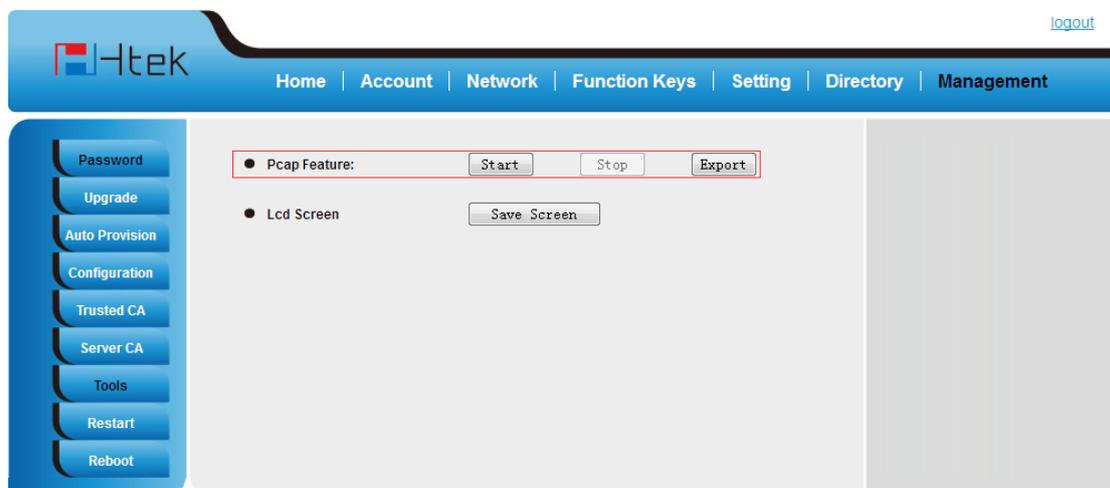

The screenshot shows the Htek web interface. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. A sidebar on the left lists various management options: Password, Upgrade, Auto Provision, Configuration, Trusted CA, Server CA, Tools, Restart, and Reboot. The main content area displays the 'Image Version' section with fields for Major Version (IMG--2.15.4.2(2017-09-08 16:16:00)) and Minor Version (IMG--2.15.4.2(2017-09-06 18:06:00)). Below this, the 'Reset To Factory' option is selected and highlighted with a red box, with a 'Reset To Factory' button next to it. The 'ROM Firmware Upgrade' section shows a file selection button and an 'Upgrade' button. A 'NOTE' section on the right provides information about the image version and the 'Reset To Factory' action.

## Pcap Feature

To use pcap via web interface:

1. Click Management → Tools
2. Click Start and then operation the phone
3. When finish the operation, click stop and then click Export.
4. Then you'll get the Pcap captures.

The screenshot shows the Htek web interface. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. A sidebar on the left lists various management options: Password, Upgrade, Auto Provision, Configuration, Trusted CA, Server CA, Tools, Restart, and Reboot. The main content area displays the 'Pcap Feature' section with 'Start', 'Stop', and 'Export' buttons highlighted in a red box. Below this, the 'Lcd Screen' section shows a 'Save Screen' button.

## System Log

To download system log via web interface:

1. Click Management→Configuration
2. Click  of the system Log
3. Then you'll get a txt file: syslog.txt.

## Upgrade

To upgrade via HTTP, the “Management”->“auto provision” ->” Firmware Upgrade”-> “Upgrade Mode” field needs to be set to HTTP, respectively. “Firmware Server Path” needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

- e.g. firmware.mycompany.com:5688/Htek
- e.g. www.mycompany.com:5688/fm/Htek
- e.g. 218.2.83.110

**Instructions for firmware upgrade via HTTP:**

(1) End users can choose to download the free HTTP server from <http://httpd.apache.org/> or use

Microsoft IIS web server. Then setup HTTP server.

(2) Unzip the firmware file and put all of them under the root/fm directory of the HTTP server.

(3) Visiting “HTTP:\\192.168.0.254\fm\fw912P.rom on localhost by browser” to verify the HTTP Server. If visiting “HTTP: \\192.168.0.254\fm\fw912P.rom on other computer is no prompt to download fw912P.rom file, please check the firewall (Suggest close the firewall).

**To configure the server path via web interface:**

1. Click Management→Auto provision:
2. Select the upgrade mode in the upgrade mode field
3. Enter the Firmware server path and config server path (192.168.0.254 is HTTP server).
4. Enter the HTTP server’s username and password (optional).

5. Click the SaveSet button to save the configuration.
6. Restart the UC912P, IP Phone will restart and auto-get firmware files from HTTP server.

#### NOTES:

- Htek recommends end-user use the Htek HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a “Firmware Server Path” is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC912P will attempt to retrieve the new image files by downloading them into the UC912P’s SDRAM. During this stage, the UC912P’s LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC912P will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.
- Htek’s latest firmware is available at <http://www.htek.com> →Support→Firmware Download.
- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

#### To upgrade manually via the Web configuration interface

1. Click Management → Upgrade

2. Click Brower or the blank.

3. Select the firmware (fw912P.rom )and then click  .

The screenshot shows the Htek management interface. The top navigation bar includes 'Home', 'Account', 'Network', 'Function Keys', 'Setting', 'Directory', and 'Management'. The left sidebar contains 'Password', 'Upgrade', 'Auto Provision', 'Configuration', 'Trusted CA', 'Server CA', 'Tools', 'Restart', and 'Reboot'. The main content area is divided into sections: 'Image Version' (Major Version: IMG--2.15.4.2(2017-09-08 16:16:00), Minor Version: IMG--2.15.4.2(2017-09-06 18:06:00)), 'Reset To Factory' (with a 'Reset To Factory' button), and 'ROM Firmware Upgrade' (with '选择文件', '未选择任何文件', and 'Upgrade' buttons). A 'NOTE' section on the right provides information about the 'Image Version' and 'Reset To Factory' actions.

## Configuration File

**To download configuration file:**

1. Click Management → Configuration → Download Device Configuration

2. Then you can get a file: cfg.bin or cfg.xml

Home | Account | Network | Function Keys | Setting | Directory | Management

Configuration

- Download Device Xml Configuration | Download Xml File
- Restore Xml Configuration | 选择文件 | 未选择任何文件 | Restore Xml Configuration
- Download Device Bin Configuration | Download Bin File
- Restore Bin Configuration | 选择文件 | 未选择任何文件 | Restore Bin Configuration
- Download User Bin Configuration | Download User Bin File
- Delete User Configuration | Delete User File

System Log

Download System Log | Download

Syslog Server |

Syslog Level | NONE

SaveSet | Cancel

**NOTE**

**Configure File:**  
You can save the phone's configuration file to a backup location, and also restore a backup configuration file

**System Log:**  
There are two ways to export the system log: download directly, or download by the Syslog server

### To Restore a configuration file:

1. Click Management → Configuration → Restore configuration

2. Select the xxx.bin or xxx.xml file, and then Click the **Restore Bin Configuration**, then IP Phone will reboot.

Home | Account | Network | Function Keys | Setting | Directory | Management

Configuration

- Download Device Xml Configuration | Download Xml File
- Restore Xml Configuration | 选择文件 | 未选择任何文件 | Restore Xml Configuration
- Download Device Bin Configuration | Download Bin File
- Restore Bin Configuration | 选择文件 | 未选择任何文件 | Restore Bin Configuration
- Download User Bin Configuration | Download User Bin File
- Delete User Configuration | Delete User File

System Log

Download System Log | Download

Syslog Server |

Syslog Level | NONE

SaveSet | Cancel

**NOTE**

**Configure File:**  
You can save the phone's configuration file to a backup location, and also restore a backup configuration file

**System Log:**  
There are two ways to export the system log: download directly, or download by the Syslog server

## Troubleshooting

### Why is the phone LCD screen blank?

1. Ensure your phone is properly plugged into a functional AC outlet.
2. Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
3. If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
4. If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
5. Check that the power LED is on to ensure the phone is powered on.

### Why does the phone display "Network Unavailable"?

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.
- Contact your system administrator for more information.

### Why can't I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to [.Phone Installation.](#)
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

### Where to set the tone?

You can set the tone on web interface:

- Click Setting→Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- More Click [Tone Notes.](#)

## How to download XML Configuration?

- Click Management → Configuration → Download Xml File

## How to Import Trusted CA certificate?

- Click Management → Trusted CA

The screenshot shows the Htek Management interface. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The left sidebar has buttons for Password, Upgrade, Auto Provision, Configuration, Trusted CA (selected), Server CA, Tools, Restart, and Reboot. The main content area displays a table with columns: Index, Issued TO, Issued By, Expiration, and Delete. The table contains 10 rows with indices 1 through 10. Below the table is a 'Delete' button. Underneath, there are configuration options: 'Import Trusted Certificate Files' with a file selection button (显示文件 | 未选择任何文件) and an 'Import Trusted Certificates' button; 'Only Accept Trusted Certificates' with radio buttons for On and Off (Off is selected); 'Common Name Validation' with radio buttons for On and Off (Off is selected); and 'Trusted Certificates' with radio buttons for Default Certificates (selected), Custom Certificates, and All Certificates. At the bottom are 'SaveSet' and 'Cancel' buttons. A 'NOTE' box on the right states: 'Trusted CA: you can import TLS certificate file here.'

## How to Import Server CA certificate?

- Click Management→Server CA

The screenshot shows the Htek Management interface with the 'Server CA' option selected in the left sidebar. The main content area displays a table with columns: Issued TO, Issued By, Expiration, and Delete. Below the table is a 'Delete' button. Underneath, there are configuration options: 'Import Server Certificate Files' with a file selection button (选择文件 | 未选择任何文件) and an 'Import Server Certificates' button; and 'Device Certificates' with radio buttons for Default Certificates (selected) and Custom Certificates. At the bottom are 'SaveSet' and 'Cancel' buttons. A 'NOTE' box on the right states: 'Trusted CA: you can import TLS certificate file here.'

## How to use Vlan?

- For Vlan information, please click [VLAN Note](#)

## How to use LLDP?

- For LLDP information, please click [VLAN Note](#)
- VLAN Notes including:
  1. Voice VLAN
